

REPUBLIC OF RWANDA

OCTOBER 2023 INDEX OF INDUSTRIAL PRODUCTION (IIP)

This is the monthly Index of Industrial Production (IIP). Series has been developed by the National Institute of Statistics of Rwanda (NISR) to provide more timely estimates of the broad trends of industrial output.

NATIONAL INSTITUTE OF STATISTICS OF RWANDA

Monthly Index of Industrial Production– Formal Activity–October 2023

1. Introduction

This is the monthly Index of Industrial Production (IIP). The IIP, one of the core sets of economic indicators, enables to monitor the industrial production trend in Rwanda during a month compared to corresponding month of the last year. The IIP series has been developed by the National Institute of Statistics of Rwanda (NISR) to provide more timely estimates of the broad trends of industrial output. The series starting from January 2011 appears in excel format on the NISR's website alongside with this report. Highlights of IIP for October 2023 are given below.

The present report attempts to highlight the concept used and the methodology involved in compilation of IIP (see notes below) and exhibits the results during the period of January 2014 to October 2023 with the 2017 base. The results refer to the general index as well as to the sectorial indices (Manufacturing, Mining, Electricity, and Water and waste management). The scope of the IIP as recommended by the United Nations Statistical Office (UNSO) includes mining and quarrying, manufacturing, construction, electricity, gas and water production and supply. But due to constraints of data availability, the IIP compiled in Rwanda has excluded construction activities.

The IIP is being used to measure economic performance of the industries. It is a composite indicator that measures the short-term changes in the volume of production in a given period with respect to a chosen base period. The index can be a tool to compare the performance and growth of state in the industrial sector.

2. Highlights of IIP/ Summary

In October 2023, the industrial output (formal sector) increased by 4.3 percent compared to October 2022, against an increase of 4.2 percent on annual average basis.

Activities performed as follows:

- Mining and quarrying decreased by 8.4 percent
- Manufacturing increased by 0.4 percent
- Electricity decreased by 3.3 percent; and
- Water and waste management increased by 5.9 percent

Source: NISR/ Index of Industrial Production

3. Details

Some activities have contributed positively, and other activities have contributed negatively to the overall index.

The manufacturing activity has registered positive changes in some of its components. The positive change in manufacturing activity is mainly due to 39.7 percent increase in beverages and tobacco and 55.7 percent increase in chemicals, rubber and plastic product. However, the decrease of 28.0 percent in food processing tempered the positive change in manufacturing.

Table 1: Growth of sectors and their contributions to annual change

Activity	Weights	% Changes in October 2023			Contributions to annual change
		On Sept 2023	On Oct 2022	Annual average	
Mining and quarrying	13.0%	15.4%	-8.4%	24.6%	-0.6
Manufacturing of:					
<i>Food processing</i>	23.9%	-12.0%	-28.0%	-12.1%	-7.0
<i>Beverages and tobacco</i>	17.0%	15.7%	39.7%	6.4%	5.3
<i>Textiles, clothing & leather goods</i>	4.5%	-28.4%	-19.5%	5.2%	-2.0
<i>Wood, paper; and printing</i>	2.6%	20.2%	68.5%	40.9%	2.4
<i>Chemicals, rubber, & plastic products</i>	5.7%	2.1%	55.7%	15.1%	4.0
<i>Non-metallic mineral products</i>	5.1%	32.0%	36.0%	17.2%	1.9
<i>Metal products, machinery & equipment</i>	4.5%	-7.6%	11.1%	15.3%	0.6
<i>Furniture and other manufacturing</i>	3.4%	1.9%	6.3%	-11.6%	0.2
Electricity	18.9%	15.8%	-3.3%	2.4%	-0.6
Water & waste management	1.4%	2.8%	5.9%	4.7%	0.1
General Index	100%	2.7%	4.3%	4.2%	4.3

Conceptual note on IIP compilation methodology in Rwanda

The Index of Industrial Production (IIP) is a statistical instrument used to monitor the monthly trends in output of industrial activities in Rwanda. It is developed based on a range of short term (monthly) indicators of economic activity.

The IIP series were developed since 2017 and the first publication was done in June 2019. In this publication a series from January 2011 have been compiled and availed to the public. Moreover, figures in this publication are the results of the 2017 rebasing exercise explained below in this note.

The IIP in this statistical release relates to the activity of businesses in the formal sector in Rwanda, defined as those registered with the tax authorities. The IIP series is entirely consistent with the quarterly estimates of Gross Value Added published by NISR, which still provide the most comprehensive and detailed assessment of economic activity.

2017 Rebasing

The National Institute of Statistics of Rwanda finalised new series that are based on the 2017 weights replacing old series based on 2014 weights. The International best practice recommends doing it at least once in five years but in Rwanda it is compiled every three years due to the availability of information collected at a higher frequency. Note that the series from 2017 are based on the 2017 weights. For the years before 2017, the growth rates of old series are preserved by dividing the published indices by the linking factors found in the Table 7.

The IIP is produced based on monthly indicators of the volume of economic activity for eleven Rwanda Classification of Products by Activity (RCPA). These are weighted together based on the gross value added in the reference year for the series (currently, 2017), consistent with the estimates of published value added within the Gross Domestic Product series, see Table 8.

The correspondence table between RCPA and ISIC (International Standard Industrial Classification) Revision 4 is shown in Table 9.

Table 7: Linking factors between old base and new base (linking year = 2017)

Activity	Linking factors
Mining and quarrying	1.29
Food processing	1.28
<i>Manufacturing of beverages and tobacco</i>	<i>1.00</i>
<i>Manufacturing of textiles, clothing, & leather goods</i>	<i>2.25</i>
<i>Manufacturing of wood and paper; & printing</i>	<i>1.18</i>
<i>Manufacturing of chemicals, rubber & plastic products</i>	<i>1.62</i>
<i>Manufacturing of non-metallic mineral products</i>	<i>1.95</i>
<i>Manufacturing of metal products, machinery & equipment</i>	<i>1.69</i>
<i>Furniture and other manufacturing</i>	<i>1.23</i>
Electricity	1.32
Water and waste management	1.14
General Index	1.29

Source: NISR/Index of Industrial Production

N.B: -The series from 2017 are based on the new weights.

-For the years before 2017, the growth rates of old series are preserved by dividing the old series by the above linking factors.

Table 8: 2017 Gross Value Added

Activity	Gross Value Added (RWF, billions)	Percentage of total GVA
Mining & quarrying	57.4	13.0%
Manufacturing of food processing	105.8	23.9%
Manufacturing of beverages & tobacco	75.3	17.0%
Manufacturing of textiles, clothing & leather goods	19.9	4.5%
Manufacturing of wood & paper; printing	11.5	2.6%
Manufacturing of chemicals, rubber & plastic products	25.0	5.7%
Manufacturing of non-metallic mineral products	22.4	5.1%
Manufacturing of metal products, machinery & equipment	20.0	4.5%
Furniture & other manufacturing	15.0	3.4%
Electricity	83.6	18.9%
Water & waste management	6.2	1.4%
Total	442.1	100.0%
