FIGURE 1. 1 ADMINISTRATIVE MAP OF KIREHE DISTRICT.....	XI
CHAPTER 1: POPULATION SIZE, SPATIAL DISTRIBUTION, AND STRUCTURE	1
1.1 SIZE AND SPATIAL DISTRIBUTION OF THE POPULATION	1
1.1.1 SIZE AND SPATIAL DISTRIBUTION OF THE POPULATION OF EASTERN PROVINCE.....	1
1.1.2 POPULATION DENSITY OF THE EASTERN PROVINCE BY DISTRICT	1
1.1.3 SIZE AND SPATIAL DISTRIBUTION OF THE POPULATION OF THE KIREHE DISTRICT	3
1.1.4 SIZE AND SPATIAL DISTRIBUTION OF THE POPULATION OF KIREHE DISTRICT BY RESIDENCE AREA	3
1.1.5 AGE-SEX STRUCTURE OF THE POPULATION OF KIREHE DISTRICT	4
1.1.6 POPULATION SHARE OF SOME SPECIFIC INTERVENTIONS TARGET GROUPS IN KIREHE DISTRICT BY SEX	5
CHAPTER 2: CHARACTERISTICS OF THE POPULATION	7
2.1 SOCIO-CULTURAL CHARACTERISTICS OF THE POPULATION	7
2.1.3 MARITAL STATUS OF THE RESIDENT POPULATION OF KIREHE DISTRICT	8
2.2.1 MARTIAL STATUS BY SECTOR	8
2.2.2 MARITAL STATUS BY AGE GROUPS	9
2.3 EDUCATIONAL CHARACTERISTICS OF THE POPULATION OF KIREHE DISTRICT	10
2.3.2 GROSS AND NET ATTENDANCE RATE (%) IN PRIMARY SCHOOL IN KIREHE DISTRICT	13
2.3.3 GROSS AND NET ATTENDANCE RATE (%) IN SECONDARY SCHOOL	14
2.3.2.2 HIGHEST LEVEL OF SCHOOL ATTENDED IN KIREHE DISTRICT	15
2.4 CHARACTERISTICS OF THE EMPLOYED POPULATION.....	16
2.4.2 EMPLOYMENT TO POPULATION RATIO(EPR) AMONG THE RESIDENT POPULATION OF KIREHE AGED 16 YEARS AND ABOVE BY AGE GROUP AND SEX	17
CHAPTER 3: SUB-POPULATION	19
3.1 CHILDREN POPULATION (0-17 YEARS).....	19
3.1.1 NUMBER AND SHARE OF CHILDREN IN KIREHE DISTRICT	19
3.1.2 CHILDREN WITH BIRTH REGISTRATION IN KIREHE DISTRICT	19
3.1.3 BIRTH REGISTRATION BY SECTOR.	20
3.2.1 THE YOUTH POPULATION OF KIREHE DISTRICT	21
3.2.2 EDUCATIONAL CHARACTERISTICS OF YOUTH	21
3.2.3 HIGHEST LEVEL OF EDUCATION ATTENDED BY YOUTH IN KIREHE DISTRICT	22
3.2.5 DISTRIBUTION (%) OF THE CURRENTLY EMPLOYED YOUTH AGED 16-30 YEARS BY PROVINCE, DISTRICT, SECTOR AND STATUS IN EMPLOYMENT.	24
3.2. 6 PROPORTION OF YOUTH (16-30) NEITHER IN EMPLOYMENT NOR IN EDUCATION OR TRAINING IN EASTERN PROVINCE BY SEX, DISTRICT, AND AREA OF RESIDENCE.....	25
3.3 PERSONS WITH DISABILITIES	25
3.4 ELDERLY POPULATION (60 YEARS AND ABOVE).....	27
3.4.1 ELDERLY POPULATION OF KIREHE DISTRICT BY SECTOR	27
3.4.2 EMPLOYMENT AMONG ELDERLY PEOPLE	28
3.4.3 MARITAL STATUS OF ELDERLY PEOPLE	29

CHAPTER 4: HOUSEHOLDS AND HOUSING CHARACTERISTICS	30
4.1 HOUSEHOLD CHARACTERISTICS	30
4.1.1 NUMBER AND MEAN SIZE SIZE OF THE PRIVATE HOUSEHOLDS	30
4.1.2 PRIVATE HOUSEHOLDS' HEADS OF KIREHE DISTRICT	30
4.2 HOUSING CHARACTERISTICS.....	31
4.2.1 TYPE OF HABITAT	31
4.2.2 TENURE OF THE HOUSING	33
4.2.3 MATERIAL OF THE HOUSING UNITS.....	35
4.2.3.1 MAIN MATERIALS OF THE ROOF.....	35
4.2.3.2 MAIN MATERIALS OF THE WALLS	36
4.2.3.3 MAIN MATERIALS OF THE FLOOR	38
4.3 SOURCE OF ENERGY OF THE PRIVATE HOUSEHOLDS.....	39
4.3.1 GRID LINE CONNECTIVITY IN KIREHE DISTRICT	39
4.3.2 MAIN SOURCE OF ENERGY FOR LIGHTING IN KIREHE DISTRICT	41
4.3.3 MAIN SOURCES OF ENERGY FOR COOKING IN KIREHE DISTRICT	43
4.3.4 WATER AND SANITATION OF THE PRIVATE HOUSEHOLDS IN KIREHE DISTRICT.....	45
4.3.4.1 MAIN SOURCE OF DRINKING WATER	45
4.3.4.3 MODE OF WASTE DISPOSAL IN KIREHE DISTRICT	49
4.4 ASSETS POSSESSED BY PRIVATE HOUSEHOLDS.	51
4.4.1 COMMUNICATION ASSETS POSSESSED BY PRIVATE HOUSEHOLDS IN KIREHE DISTRICT	51
4.4.2 ACCESS TO THE INTERNET	52
CHAPTER 5: AGRICULTURE IN KIREHE DISTRICT	55
5.1 THE HOUSEHOLDS ENGAGED IN CROP FARMING AND LIVESTOCK HUSBANDLY.	55
5.2 DISTRIBUTION OF PRIVATE HOUSEHOLD ENGAGED IN CROP FARMING OF DIFFERENT TYPES OF CROPS, BY SECTOR	56
5.3 DISTRIBUTION OF PRIVATE HOUSEHOLDS ENGAGED IN RAISING DIFFERENT TYPES OF LIVESTOCK, BY SECTOR.	57

Foreword

The Government of Rwanda, through the National Institute of Statistics of Rwanda (NISR) conducted the 2022 Rwanda Population and Housing Census to provide updated demographic, social and economic indicators for policy formulation and planning to support the national development agenda and track the implementation of national, regional, continental and global development goals, such as the First National Strategy for Transformation (NST1 2017-2024); the AU Agenda 2063; and the Sustainable Development Goals (SDGs).

The Population and Housing Census in Rwanda dates back to the year 1978 when the first ever modern census was implemented. The second, third, and fourth censuses were carried out in 1991, 2002, and 2012 respectively. The 2022 Population and Housing Census marks therefore the Fifth in the series following the United Nations Recommendations to conduct a census every ten years.

Considering census' crucial importance for the planning process, the Government of Rwanda has made the Population and Housing Census a priority to be undertaken every 10 years and adopted the use of technologies for timely delivery of census results for use.

Results of the 2022 Population and Housing Census provide population numbers from national to the lowest administrative level, as well as demographic and socio-economic indicators at both national and district levels. The census remains the only national data collection exercise that can provide the lowest levels of disaggregation to support decentralised decision making across the country.

I would like therefore to take this opportunity to thank all stakeholders that contributed to the success of the 2022 Population and Housing Census. They include Ministries and other Government institutions, international organizations such as the World Bank (WB), the European Union (EU), the United Nations Population Fund (UNFPA), One-UN, UN Women, UNICEF, UNECA, the United Kingdom AID (UKAID), the African Development Bank (AfDB), the USAID, Enabel, PARIS 21 and others for their support in diverse ways.

My special thanks go to the local government leaders from the province to the village levels who contributed a lot to the success of the 2022 Population and Housing Census. Exceptional gratitude to all enumerators, teachers and young people who collected the information and all respondents for their cooperation and dedication. The National Institute of Statistics of Rwanda (NISR) deserves special appreciation for the excellent operational and coordination of all census activities.

I finally recommend that the invaluable information contained in different thematic reports of the 5th Rwanda Population and Housing Census be used as updated evidence for all decision and policy making for the national, regional and global development programs.

Dr. Uzziel NDAGIJIBANA
Minister of Finance and Economic Planning

Acknowledgements

The National Institute of Statistics of Rwanda (NISR) is pleased to release the results of the Fifth Population and Housing Census (RPHC5). The execution of different Census phases: preparatory works, data collection, data processing, tabulation and data analysis spans a period of about four years between 2020 and 2023.

NISR is pleased to publish the main indicators report as the main flagship report of the RPHC5. This report will be followed by several thematic reports and districts profile reports. The main indicators report covers several issues mainly population size and distribution, education, settlement, population projections to mention but a few. NISR hopes that the results in this report supplemented by the upcoming thematic reports would meet the demand of census data users across the board.

On this occasion, I would like to extend my sincere gratitude to the Government of Rwanda and development partners for availing financial, logistical and technical support. The NISR would like to appreciate all stakeholders who worked tirelessly with us to ensure that the 2022 Rwanda Population and Housing Census operation was successful.

Special recognition also goes to the Ministry of Finance and Economic Planning, Ministry of Defense, Ministry of Local Government, Ministry of Education, Ministry of Foreign Affairs, Ministry of ICT and Innovation, Ministry of Interior, Ministry of Health, Ministry in Charge of Emergency Management, the Rwanda National Police, Rwanda Correctional Services, Rwanda Biomedical Center (RBC), Rwanda Information Society Authority (RISA), Rwanda Utilities Regulatory Authority (RURA), Rwanda Public Procurement Authority (RPPA), Office of Government Spokesperson (OGS), and Rwanda Broadcasting Agency (RBA) for the direct involvement in awareness campaign, logistical and data collection operations.

I also wish to express my appreciation to the local government authorities and NISR staff for their excellent operational organization and to the tens of thousands of enumerators and supervisors for their painstaking efforts throughout the data collection phase.

Finally, the people of Rwanda, residents, and visitors, your cooperation was crucial towards the success of the census.

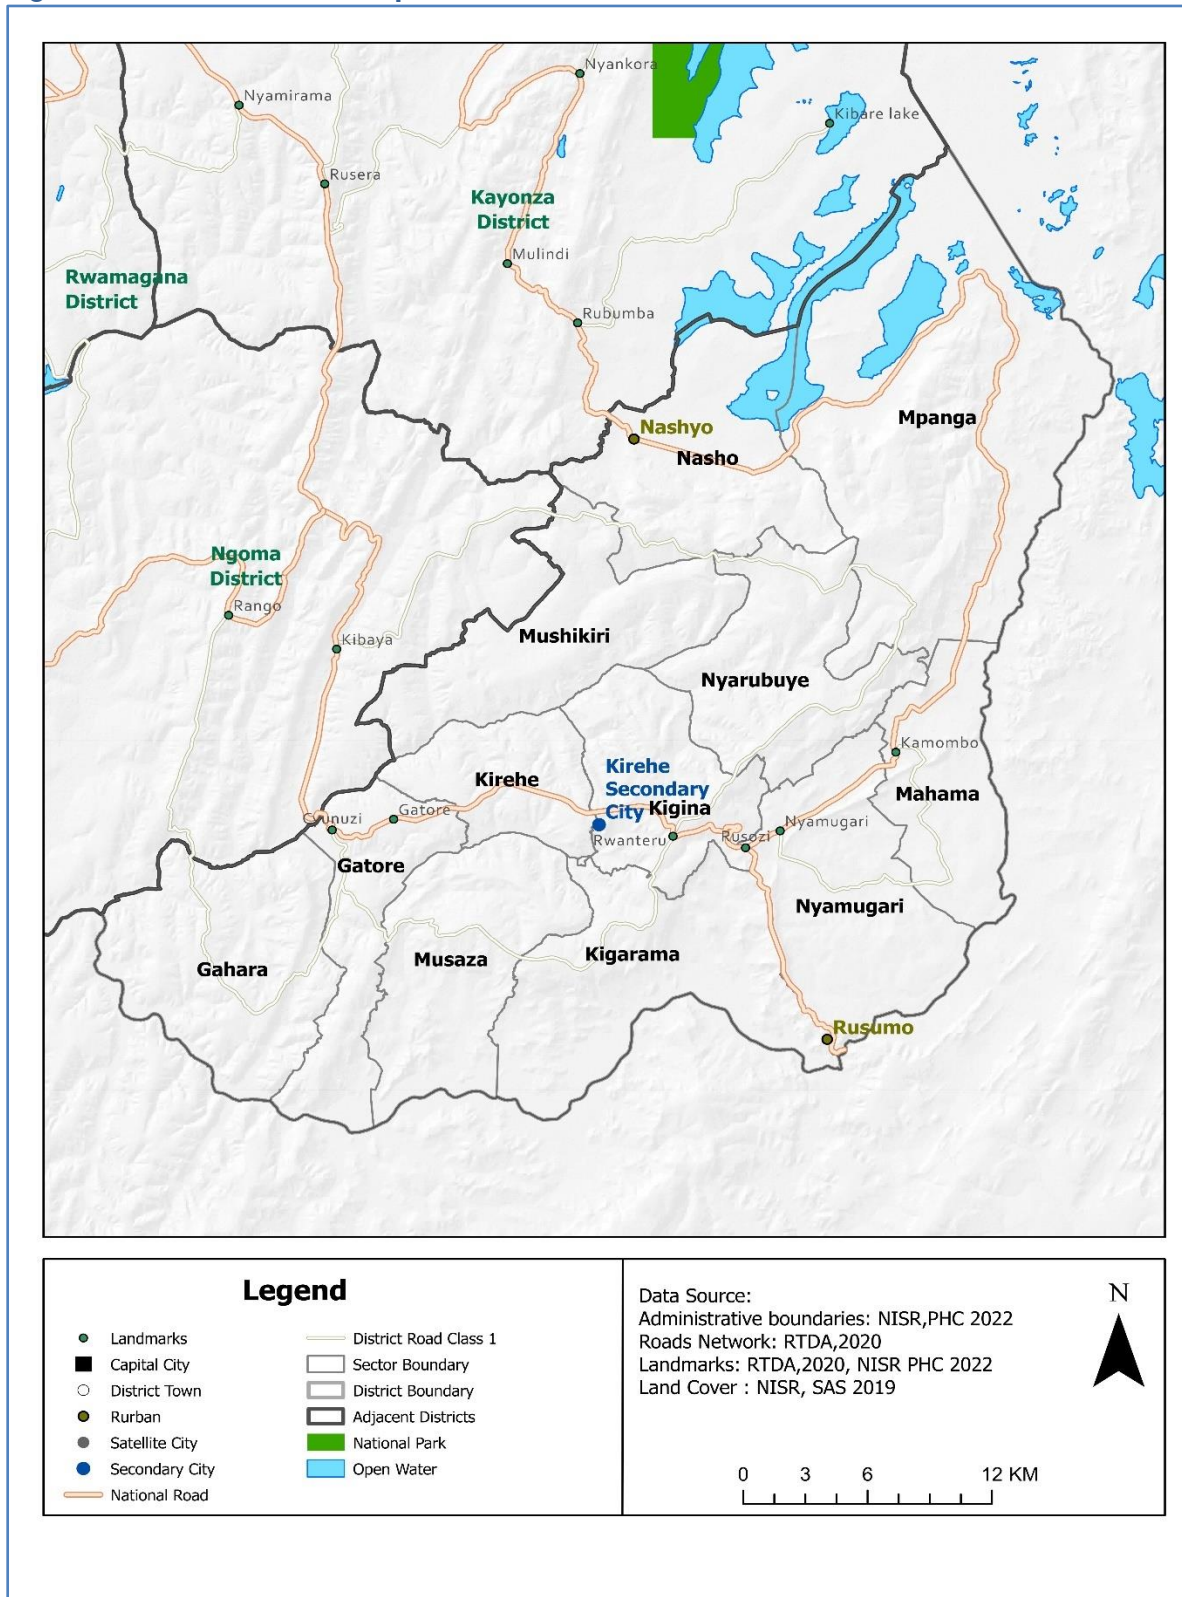

Thank you.

MURANGWA Yusuf
Director General,
National Institute of Statistics of Rwanda

CHAPTER 1: POPULATION SIZE, SPATIAL DISTRIBUTION, AND STRUCTURE

1.1 Size and spatial Distribution of the population

1.1.1 Size and Spatial Distribution of the Population of Eastern Province

The 5th Rwanda Population and Housing Census (PHC5) has enumerated 3,563,145 residents in the Eastern Province, which represents 26.89% of the total population of Rwanda (13,246,394 residents).

The population of the Eastern Province is predominantly female; 1,828,751 are women corresponding to 51.3 % of the total population of the Eastern Province.

Nyagatare is the most populated district with 653,861 residents in 2022. Its population represents 18.4% of the total residents' population of Eastern Province. The last populated district in the Eastern Province is Ngoma with 404,048 inhabitants, corresponding to 11.3% of the total resident population of Eastern Province.

Table 1. 1 Resident population distribution of Eastern Province by sex and District

Districts	Counts			Percent			Population share(%)
	Both sexes	Male	Female	Both sexes	Male	Female	Both sexes
Rwanda	13,246,394	6,429,326	6,817,068	100	48.5	51.5

1.1.2 Population Density of the Eastern Province by District

Population density is a measurement of population per unit land area. Density is the number of the inhabitant per Km². The Rwanda Population and Housing Census conducted in 2022 revealed that, the population density in Rwanda is 503 inhabitants per Km².

The Eastern Province has 433 inhabitants per Km². The district with a high population density is Rwamagana with 740 Inhabitants per km². The district with a lowest population density is Kayonza with 338 Inhabitants per km².

The figure below indicates distribution of population density per district.

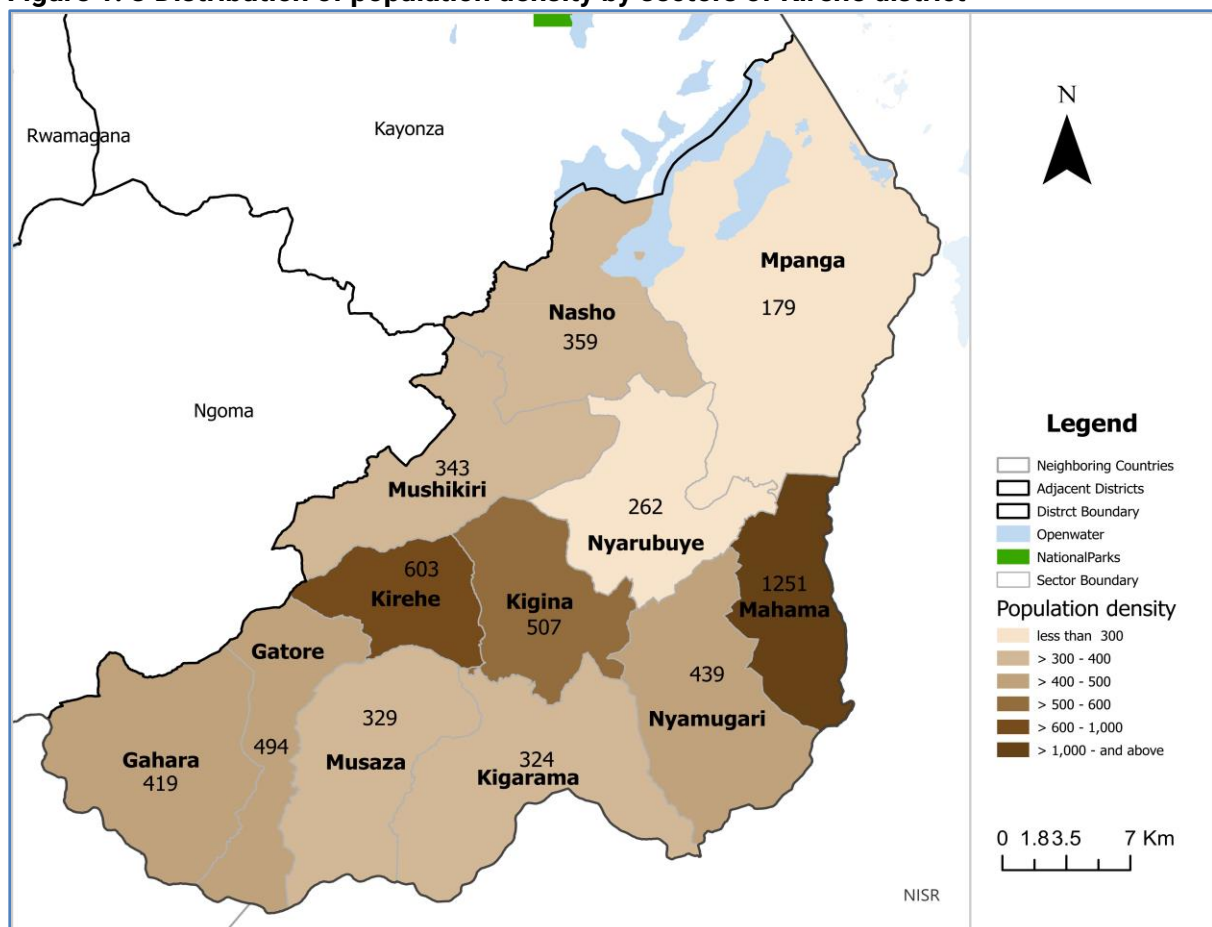

Figure 1. 2 Population density (inhabitant per Km²) by district in Eastern Province

Source: Fifth Rwanda Population and Housing Census, 2022 (NISR)

The population density of Kirehe District by sector are displayed in the map below:

Figure 1. 3 Distribution of population density by sectors of Kirehe district

1.1.3 Size and Spatial Distribution of the Population of the Kirehe District

The 5th Rwanda Population and Housing Census (PHC5) has enumerated 460,860 residents in Kirehe District, which represent 12.9% % of the total population of the Eastern Province (3,563,145 residents). The population of Kirehe District is predominantly female: 239,097 are women corresponding to 51.9 % of the total population of Kirehe District.

Females are predominant in all sectors of the district.

Mahama (81,014 population) is the most populated sector. Its population represents 17.6% of the total population of Kirehe District.

The two less populated sectors are Nyarubuye (22,660 inhabitants) and Kirehe (29,547 inhabitants). They represent 4.9 and % 6.4% of the total resident population of Kirehe District, respectively

Table 1. 2 Distribution of Resident Population of Kirehe District by Sector and sex in 2022

District and Sectors	Counts						Population share (% of the total population)
	Both sexes	Male	Female	Both sexes	Male	Female	Both sexes

1.1.4 Size and Spatial Distribution of the Population of Kirehe District by residence area

The results of Rwanda Population and housing census 2022 revealed that, the total population of Rwanda are spatially distributed in rural area that represent 72.1% and urban area represent 27.9%. The Eastern Province is predominantly by the urban area (86.9%) and rural area (13.1%). Kirehe District population is predominantly by rural area 93.7% while urban represents 6.3%. The sectors of Kirehe District which are entirely rural are Gahara, Gatore, Kigarama, Mpanga, Musaza, Mushikiri and Nyarubuye are entirely while the remaining are somehow urban. The Table below 1.3 illustrates the results.

Table 1. 3 Distribution (Count and %) of Resident Population of Kirehe District by sector and area of Residence in 2022

District and Sectors	Counts			Percentage		
	Total	Urban	Rural	Total	Urban	Rural
Rwanda	13,246,394	3,701,245	9,545,149	100.0	27.9	72.1

1.1.5 Age-Sex Structure of the Population of Kirehe District

Kirehe population is mostly young. 60.0% of the resident population of Kirehe is under 25 years, as shown by the age pyramid (Figure 4), reflecting the high level of fertility in the recent past. The elderly (60 years and above) represents 6.38 % of the total population of the district.

The Table below 1.4 illustrates the results, and more details of sectors are in the annex.

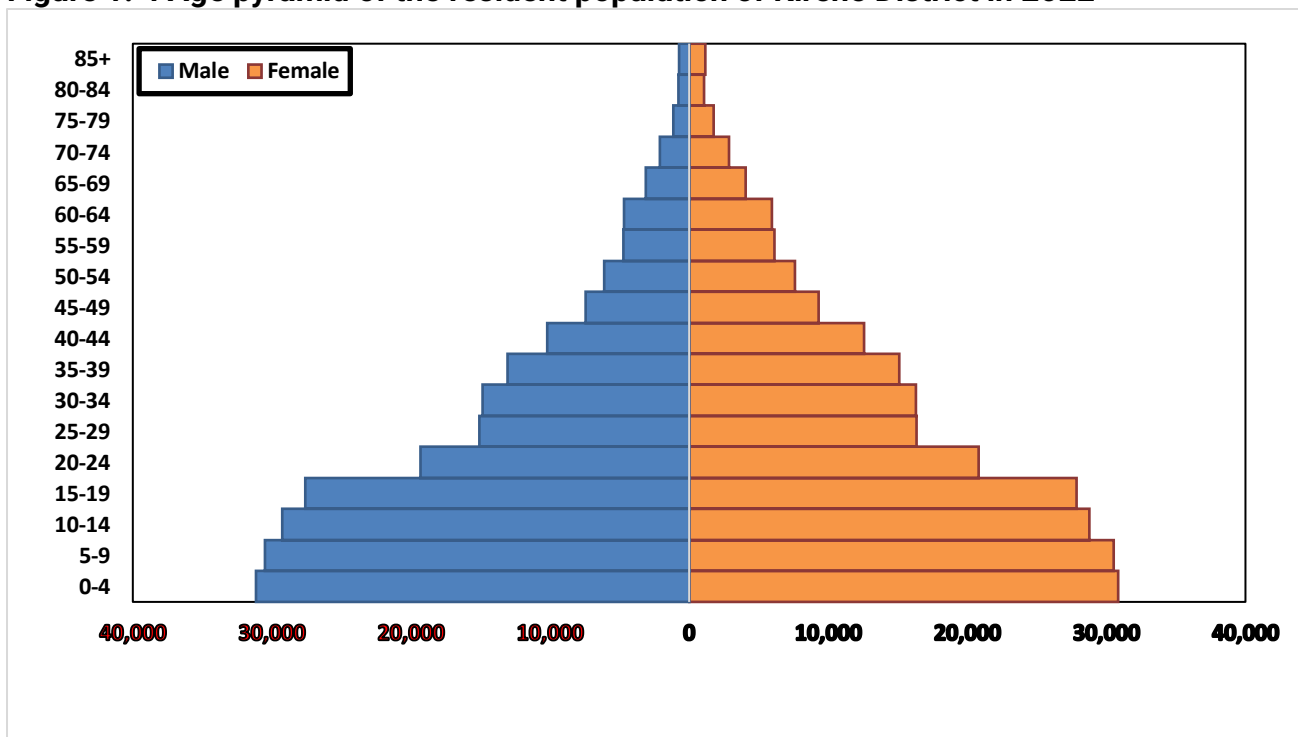

Table 1. 4 Distribution (Count and %) of Resident Population of Kirehe District by 5-year Age Group and Sex in 2022

Kirehe District	Counts			Percent

1.1.6 population share of some specific interventions target groups in Kirehe District by sex

The Rwanda population and housing census 2022 indicate the population on specific ages-based programs, policy and strategies interventions in health, education, employment and also indicates the population categories in their respective characteristics such as children, youth, working population, among other things. For instance, children under five years for immunization programs (U5 children), children in education (3-17 years), people in the official working age group (16 years and above), etc. Knowing the size of such groups is of great importance for the design, implementation, monitoring, and evaluation of programs targeting such groups. The above Table gives the size of the main interventions target groups by sex, and their share in the entire population of Kirehe District. The population aged 0-17 represents 46.7 % of the total population of the district, 16-30 years represent 26.7%; the economically active population aged 16 years and above represents 58.2 % of the same population.

The Table below shows distribution of Kirehe Districts by targeted interventions by their age.

Table 1. 5 Number and population share(5) of some specific interventions target groups in Kirehe District by sex

Kirehe District	Population			Percent		
	Both sexes	Male	Female	Both sexes	Male	Female

CHAPTER 2: CHARACTERISTICS OF THE POPULATION

2.1 Socio-cultural characteristics of the population

2.1.1 Distribution (Count and %) of the resident population of Kirehe District by Nationality and by sector

The results of 5th RPHC-2022 indicate that, the Rwandan population by nationality represent 99.1% and foreigners represent 0.89%. In the Eastern Province, foreigners represent 1.70% and Kirehe Districts, the Rwandan by nationality represent 90.44% and foreigners represent 9.56% (44,039). One sector of Kirehe District has the highest percentage of foreigners compared to others; that is Mahama (53.36%). The Table below illustrates the distribution of the population by nationality with their respective sectors of residence.

Table 2. 1 Distribution (count and %) of the resident population of Kirehe District by Nationality and sector

Sectors	Count			Percentage		
	Total	Rwandan	Foreigner	Total	Rwandan	Foreigner

2.1.3 Marital Status of the resident population of Kirehe District

2.2.1 Martial status by sector

The results of 5RPHC-2022, 50% of the resident population of Kirehe District aged 12 and above were currently married (married to one wife/husband officially, married to one wife/husband not officially, living in union) at the time of the census, while 43.0% were never married. 4.7% were widowed, while separated and divorced were respectively 2.1% and 0.2%.

At the sector level, two sectors, Kigarama (53.9), Nasho(52.9%) and Musaza (52.5%) have the highest percentages of the currently married people. Mahama (49.0) has the highest percentages of the never married persons. Nyamugari and Nyarubuye sectors have high percentage of widowed persons (5.9% and 5.3% respectively). Details of the resident population of Kirehe District aged 12 years and above by marital status and sex is presented in the annex.

Table 2. 3 Distribution (%) of the resident population of Kirehe district aged 12 years and above by marital status and sector (both sexes)¹

Sectors	Total population aged 12+	Total	Married to one wife/husband officially	Married to one wife/husband not officially	Live in a polygamous union	Divorced	Separated	Never married	Widowed

2.2.2 Marital status by Age groups

The percentages of resident population of Kirehe District by marital status vary by sex and age: The percentage of never married persons decreases from 99.9% (age group of 12-14 years) to 1.1% (age group of 80 years and above). The percentage of persons currently living in union starts by increasing from 0.1% (age group of 12-14 years) to a maximum of 87% (age group of 40-44 years) before decreasing to 51.7% (age group 85+) due mainly to widowhood (46.5%). The highest percentage of divorced persons (0.7%) is observed from age group 45-49, while the highest percentage of the separated persons (4.1%) is found in age group 40-44 years.

¹ The Distribution (%) of the resident population of Kirehe district aged 12 years and above by Marital status and Sector by Male and by Female is in the annex

Table 2. 4 Distribution (%) of the resident population of Kirehe District age 12 years and above by Marital status and, Age groups [Both sexes]

2.3 Educational Characteristics of the Population of Kirehe District

2.3.1 School attendance

Table 2.5 below shows that, in Kirehe District, 53.4% of pre-primary-age population(3-5 years) are currently attending school, 46.6% of those children have never attended and none(0%) of those children have previously attended(i.e children have already had prior exposure to pre-primary school education before the time of census but who were not attending nursery school/dropped-out during census time). Musaza and Mushikiri Sectors have the highest proportions of children (age between 3 to 5) currently attending school in Kirehe District (59.7% and 58.5% respectively). Gahara sector has the lowest percentage of children currently attending school, with only 40.2% enrolled. On the other hand, Gahara and Nyamugari sectors have the highest proportion of children aged 3 to 5 who have never attended school (59.8 and 58.5%, respectively).

Table 2. 5 Distribution (count and %) of the pre - school-age (3-5 years) population of Kirehe District by Sector and by school attendance status(Both sexes²).

Sectors	Preprimary age (3-5 years)

Source: Fifth Rwanda Population and Housing Census, 2022 (NISR)

Table 2.6 shows that in Kirehe District 90.1% of children age 6 to 11 years (the official primary school-going age) are currently attending school 8.1% have never attended school and only 1.5% have previously attended school (which means that 10 of children aged 6 to 11 are out of school).

By comparing the distribution of the primary school-age population (6-11 years) across sectors in Kirehe District, comparisons reveal the disparities in primary school attendance across different sectors within Kirehe District. Sectors like Nyamugari, Kigarama and Gahara exhibit lower rates of children currently attending school (85.8%, 85.3% against 87.1%, respectively) while Mahama(5.2%), Kirehe, Mushikiri and Nasho have the higher rates of children who have never attended (7.0% each). On the other hand, sectors like Mahama and Nyarubuye demonstrate higher rates of children currently attending school (94.2 against 92.0%, respectively).

² The Distribution (count and %) of the pre - school-age (3-5 years) population of Kirehe District by Sector and by school attendance status by male and by female is in the annex

In Kirehe District 22.4% of the population aged 12 to 17 have previously attended school (i.e. they dropped out of school), 74.8% are currently attending school and 2.8% have never attended secondary school.

The distribution of the secondary school-age population (12-17 years) across sectors in Kirehe District, shows that Mahama sector has the highest percentage of the population aged 12 to 17 currently attending school at 83.8%. Conversely, Kigarama sector has the lowest percentage of the population aged 12 to 17 currently attending school with 65.3% and the highest percentage of the population between the ages of 12 and 17 who have never attended school at 4.0%.

2.3.2 Gross and Net Attendance Rate (%) in Primary School in Kirehe District

Gross and Net Attendance Ratios are used to measure the extent of coverage of an educational program. It gives a comparison of the children attending school with the total size of the school-age population. It can also be used for assessing how far a country has succeeded in bringing to school all those who are eligible to attend.

The results of 5th RPHC 2022 reveal that not all children attending primary school level are of the official age for that level (6-11 years). The gross attendance rate in Rwanda and in Eastern Province GAR is 141.7 and 151.2 in Kirehe Districts.

At sector level, GAR are greater than 140 in all sectors where it is low in Nyamugari(141.7), %).

The net attendance rate (NAR) in Primary school for Kirehe District (90.0%) is higher than the NAR of national level(89.3%) and that of Eastern Province(87.4 %).

A Gross Attendance Rate (GAR) of 151.2% in Kirehe District for the population 6 to 11 years indicates a high percentage of those who attended primary schools aged below 6 years and or above 11 years. On the other hand, the NAR of 90.0% for the population 6 to 11 years indicates that only 90.0% of the population 6 to 11 years were attending primary schools in Kirehe District by 2022 (Table 2.8). In 2022, students older or younger than the official primary school age range made up 40.5% $[(GAR151.2 - NAR90.0)/GAR151.2]$ of the primary school population of Kirehe District.

With a NAR of 94.1%, the Mahama Sector has the greatest percentage of pupils that are attending primary school and are of primary school-age. In comparison to other sectors, the Nyamugari and Kigarama sectors have the lowest NARs at 85.3% and 85.8% respectively) indicating a lesser percentage of pupils who are attending primary school within the eligible age range. All sectors have gender parity indexes greater than or equal to 1.00 except GatoreKi sector (1.00), suggesting better access to education for female students compared to male students.

The Table below displays results:

Table 2. 8 Gross and Net Attendance Rates (%) in Primary School level (Children aged 6-11 years) of Kirehe District by Sex and Sector⁵

2.3.3 Gross and Net Attendance Rate (%) in Secondary School

The table 2. 9 provides information on the gross and net attendance rates in the secondary school level (12-17 years) in Kirehe District, disaggregated by sex and sector.

The City of Kigali and Kirehe District both have lower NARs than the national average (19.2% and 18.3%, respectively, versus 22.3%) when compared to the national average. Comparing males and females in Kirehe District in terms of Net Attendance Rates (NAR), the table 2. 9 indicates that a higher proportion of females (20.8%) in Kirehe District, within the secondary school-age range (12-17 years), are attending school compared to males (15.8%). Female students older or younger than the official secondary school age range made up 43.5 % $[(GAR36.8 - NAR20.8) / GAR36.8]$ of the female with secondary school age of Kirehe District, while for male students it made up 53.9 % $[(GAR34.3 - NAR15.8) / GAR 34.3]$. This shows that females have a higher attendance rate in Kirehe District compared to males when considering the overall attendance rates, regardless of age or grade-level eligibility.

Among the sectors in Kirehe District, Mahama(57.0%) and Kirehe(44.6) have the highest GAR for both sexes. Sectors such as Kigarama has relatively lower GAR compared to others (18.4%). Kirehe sector has the highest NAR for both sexes in Kirehe District, with a rate of 25.1%. Kigarama sector has relatively lower(10.1%) NAR.

⁵ **Enrollment** is the act of enrolling or the state of being enrolled while Attendance is (*the state of attending*) the state of attending; presence.

2.3.2.2 Highest level of school attended in Kirehe District

The results of 5RPHC-2022 indicate that, among the population aged 3 years and above in Kirehe District, 18.6% of them has never attended any formal school, 61.3% attended the primary level, 9.4% attended lower secondary level, 5.5% has attended upper secondary and 1.5% attended university level.

The level of educational attainment varies across sectors, Mushikiri is highest percentage of primary school attendance (68.6%), Mahama is highest in both lower secondary school and upper secondary school attendance (12.3% and 9.7% respectively). Kirehe has a high percentage of 3.2% of the population attended University than other sectors. The Table below indicates the findings:

Table 2. 10 Distribution (Count and %) of the resident population of Kirehe District aged 3 and above by highest level of school attended by sector(Both sexes)⁶

2.4 Characteristics of the Employed Population

The official working age in Rwanda is 16 years and above. Aggregate employment generally increases with growing population. Therefore, the ratio of Employment to the working age population (employment to population ratio) is an important indicator of the capacity of the Economy to provide employment to a growing population. A decline in the employment-to population ratio is often regarded as an indicator of economic slowdown and a decline in total employment as an indicator of a more severe economic downturn.

2.4.1 Employment to population ratio by sex, Province, District, and area of residence

The results presented in the below Table 2.9 shows that the employment to population ratio stood at 45.9 in Rwanda, it is lower among females (40.2 percent) than males (52.4 percent). On the other side, it was observed that the employment to population ratio is higher in urban areas of Rwanda (53.5 percent) than in rural areas (42.7 percent).

It was observed that in Eastern Province, the employment to population ratio stood at 47.9 percent, it is higher in urban areas (53.1 percent) than in rural areas of City of Kigali (46.5 percent).

⁶ The Distribution (Count and %) of the resident population of kirehe district age 3 and above by highest level of school attended by sector (male , female) is in the annex .

It was also revealed that the employment to population ratio is 43.8 percent among people residing in Kirehe districts, it is higher in urban areas of Kirehe (55.2 percent) than in rural areas of Kirehe (43.0 percent).

Table 2. 11 Employment to population ratio by sex, Province, District, and area of residence

Districts	Total			Urban			Rural

2.4.2 Employment to population ratio(EPR) among the resident population of Kirehe aged 16 years and above by age group and sex

Figure 2.1 allows the study of intensity of Employment to population ratio and its variation by sex. The figure reveals the following remarks: The employment to population ratio among males increases from age group 16-19 to 30-34 and then, it starts to decreasing from this age group. Among females, it increase from age group 16-19 to 35-39.

It was observed that in district of Kirehe, the highest employment to population ratio among males stands at 70.6% and it was observed in age group 30-34, On the other side the highest employment to population among females is 53.5% and it was observed in the age group 35-39.

The lowest employment to population ratio among males stands at 9.6% and stands at 6.0% among females in the age group 85+.

CHAPTER 3: SUB-POPULATION

3.1 Children Population (0-17 years)

According to the UN Convention on the Rights of the Child (1989), a child is defined as every human being under 18 unless, under the law applicable to the child, majority is attained earlier. It is relevant to underline here that this definition by age coincides with that of Rwanda, as stipulated in Article 3 of the National Law n° 54/2011 of 14 December 2011 relating to the rights and the protection of the child, which stipulates that a child is any person under the age of 18. The age range (0–17) adopted for this report reflects this definition.

3.1.1 Number and share of children in Kirehe District

At the national level, the children population constitute 44.5% of the total population of 13,246,394 residents. The Eastern Province has 3,563,145 children with a share of 46.5% of the total resident population. In Kirehe District, the children constitute 46.7% of the resident population of the district, with a percentage of males slightly greater than the females one (48.7% vs 44.9%).

The children's share is high in Mahama (49.9%) and small in Kirehe (44.1%). The Table below indicate distribution of children by sector and by sex.

Table 3. 1 Number and share (%) of children aged 0-17 years among the total resident population of Kirehe district by sex and sector of residence.

Sectors	Total Resident population			Total resident children			Children share (%)		
	Both sexes	Male	Female	Both sexes	Male	Female	Both sexes	Male	Female

3.1.2 Children with birth registration in Kirehe District

The results of 5th RPHC 2022 indicate the percentage of children whose birth was registered is 94.3% at the national level. The birth registration rate in Kirehe District is 95.7%.

Birth registration performance is greater in urban areas (97.5%) than in the rural areas (95.6%) of Kirehe District.

The Table below illustrates the findings:

Table 3. 2 Percentage of the children aged 0-17 in Eastern Province whose birth was registered by sex, district, and area of residence.

District	Total			Urban			Rural		
	Both sexes	Male	Female	Both sexes	Male	Female	Both sexes	Male	Female

3.1.3 Birth registration by sector.

The results of 5th RPHC-2022 indicate that birth registration varies across sectors and areas of residence (urban and rural), Gahara, Gatore, Kigarama, Mpanga, Musaza, Mushikiri and Nyarubuye sectors have not urban areas.

High percentages of birth registrations are found in Nyarubuye(97.1%), Kirehe and Nyamyagri(97.0% each) while the lowest is in Mahama with (93.8%).

The percentage of birth registration for males is almost the same as the one for females.

In urban areas of Kirehe District, birth registration is 97.5% while in rural areas it is 95.6%.

Table 3. 3 Percentage of the children aged 0-17 in Kirehe District whose birth was registered by sex, Sector, and area of residence.

3.2 Youth population in Rwanda

For statistical purposes, the United Nations defines “youth”, as those persons between the ages of 15 and 24 years, without prejudice to other definitions by Member States. Considering the current priorities and trends of Rwanda’s Development, the definition of Youth in terms of age has been revised in this policy. It was brought from 14–35 years to 16–30 years.

3.2.1 The youth population of Kirehe District

The results of 5th Population and housing Census conducted in 2022 revealed that, the youth represent 27.14% (3,595,670) of the total population (13,246,394). In Kirehe District, the youth population was 123,154 which represents 26.72 % of the total resident population of the district. The sector with the highest youth share is Nasho (28.25%) while Nyarubuye (25.34%) and Mushikiri (25.54%) have the lowest share of youth. The Table below indicate distribution of youth by sector, and by sex.

Table 3. 4 Number and share (%) of the resident youth aged 16-30 years among the total resident population of Kirehe District by Sector of residence and sex

Sectors	Total resident population			Youth resident population (16-30 years)			Youth share (%)

3.2. 6 Proportion of Youth (16-30) neither in employment nor in education or training in Eastern Province by sex, district, and area of residence

The results of 5RPHC-2022 indicate that, In Rwanda the proportion of Youth (16-30) neither in employment nor in education or training stood at 39.5 %. It is higher among females (43.8 %) than males (34.9 %).

In Eastern Province, the proportion of youth (16-30) neither in employment nor in education or training is 38.9 %, it is lower among males (34.5 %) than females (43.1 %). The 2022 census results also revealed that the afore mentioned proportion is higher in rural areas of Eastern Province (40.7 percent) than in urban areas of Kigali (32.5 percent).

The proportion of youth (16-30) neither in employment nor in education or training among people residing in Kirehe district stood at 32.8 percent. It is much higher (42.1 percent) among people residing in rural areas of Kirehe district than the ones residing in urban areas of Kirehe district (32.5 percent).

The Table below (Table 3.9) indicates results on Proportion of Youth (16-30) neither in employment nor in education or training in Eastern Province by Sex, District, and Area of Residence.

3.3 Persons with disabilities

In 2015, 193 countries agreed to the 2030 Agenda for Sustainable Development and its Sustainable Development Goals with a commitment where possible, "to disaggregate the statistics they generate by disability to provide important insights about the extent to which

persons with disabilities(PWDs) are being included in society, benefit from government programmes, or are included in the workforce.

At the national level, 3.4% of the resident population aged 5 years and above have a disability while in eastern Province and in Kirehe District, the disability prevalence rate is 3.6% each.

At sector level, the highest prevalence rates of the resident population aged 5 years and above with disability are in Mahama (4.9%) and Kirehe (4.6%). The lowest is in Mushikiri and Nasho (2.8% each).

Table 3. 10 Number and share (%) of persons with disabilities in Kirehe District age 5 years and above by Sector of residence and sex

3.4 Elderly Population (60 years and above)

Rwanda has enacted laws such as the Law No 088/01 of 07/09/2020 (Office of the Official Gazette of Rwanda, 2020) on Presidential order ratifying the protocol to the African charter on human and peoples' rights on the rights of older persons in Africa adopted by the twenty sixth ordinary session of the Assembly, held in Addis Ababa, Ethiopia, on 31 January 2016 through an Official Gazette No.27 of 07/09/2020 and Law No.59/2008 of 10/09/2008 on prevention and punishment of gender- based violence (Office of the Official Gazette of Rwanda, 2008), whose Article 32 sets the penalty for violence against an elderly person.

It is over two decades since the United Nations convened the First World Assembly on Ageing (Vienna, 1982) (National Academy of Sciences, National Research Council, 2001)) that launched an international action programme, which was the first international instrument on ageing, to provide a foundation for the formulation of policies and programmes on ageing. This was done to guarantee economic and social security to older persons and other opportunities to contribute to national development.

3.4.1 Elderly population of Kirehe District by Sector

In 2022, the elderly persons constitute 6.4% of the total resident population of Kirehe District. The share of the elderly females (7.1%) is higher than the male's one (5.6%).

By sector, Gahara (7.4%) , Gatore and Nyarubuye (7.2 % each) and Kirehe(7.1%) have the highest share of elderly among their total population while Mahama have the lowest (4.6%).

3.4.2 Employment among elderly people

In Rwanda, people keep on working until old age, the share of employed persons among the elderly population stands at 28.2%. The aforementioned share is higher among the elderly males (33.7%) than elderly females (24.3%). In Kirehe District, 32.6 % of elderly people were employed. The percentage of employed elderly people is higher among males than females (37.9% vs. 28.2%).

Employment among elderly residents is high in Nyarubuye (45.0%) Musaza (43.6 %). It is low in Mahama sector (14.9%).

Table 3. 13 Distribution(count) and share of employed population among elderly people in Kirehe District by sector and Sex

3.4.3 Marital status of elderly people

In Kirehe District, more than half of the elderly population (67.2%) were married (married to one wife/husband officially, married to one wife/husband not officially, live in polygamous union) and 29.1 % were widowed. The rate of celibacy among elderly was 1.2 % while divorce or separation rate is 2.4% both.

Marital status among the elderly varies slightly by sector of residence. Marriage among elderly people is more important in Nasho (72.1%),mGahara(71.0%), Mahama(69.5%) and Mushikiri(69.3%) and. It is low in Nyamugari(60.1%) . Widowhood is widespread in Nyamugari (35.5%) and Kigina (32.3%) and lowest in Nasho (24.2%) sectors.

The Table below illustrates distribution of elderly people across sectors.

Table 3. 14 Distribution (%) of the elderly resident (aged 60 years and above) of Kirehe District by sector of residence and marital status (Both sexes)

CHAPTER 4: HOUSEHOLDS AND HOUSING CHARACTERISTICS

4.1 Household characteristics

In this chapter 5th Population and housing census 2022 investigated households and housing; those include household size, head of household by sex, type of habitat, housing tenure, materials used for construction, sources of energy used for lighting and cooking, water sources, sanitation facilities, asset possessed by household and mode of waste and disposals.

4.1.1 Number and mean size size of the private households

The results of 5th RPHC 2022 indicate the total of 3,312,743 households in Rwanda, 886,132 in the Eastern Province and 113,886 in Kirehe District. The average household size in Kirehe District is 4.0 persons per household. The smallest household sizes are found in Kigarama , Kigina and Kirehe (3.9 persons/household each).

The Table below indicates number of households and size of household members per sector.

Table 4. 1 Distribution of the private households and their corresponding mean size

Sectors	Number of Private Households	Corresponding population ⁹	Average Size of Household
Rwanda	3,312,743	13,100,600	4.0
Eastern Province	886,132	3,521,227	4.0
Kirehe District	113,886	459,566	4.0

4.1.2 Private households' heads of Kirehe District

The results of the 5th RPHC 2022 revealed that 28.9% of private households are headed by women at national level. In Kirehe District, private households headed by females are 30.8%.

At sector level, the highest percentage of households headed by women is found in Mahama

⁹ This population does not include the resident population from Institutional Households

sector (40.9%) while the lowest is found in Nasho sector (25.9%).

Table 4. 2 Distribution (count and %) of private households' heads of Kirehe District by Sector and by sex of the head

Sectors	Count			Percentage

4.2 Housing Characteristics

4.2.1 Type of habitat

The results of 5th Population and Housing Census 2022 revealed that in the Eastern Province the predominant type of habitat is Umudugudu (Planned rural settlement) housing with 86.5%. The most common type of habitat in Kirehe District is also the Umudugudu (Planned rural settlement) housing with 87.8%, followed by Old settlement (7.9%) and dispersed or isolated housing (1.0%).

At sector level, the Umudugudu (Planned rural settlement) housing type of habitat is most prevalent in Nyarubuye (99.0%) and it is also more than 90% in the remaining sectors except in Mahama where it occupies 40.5%. The sectors with the high percentages of Old settlement housing units are Mahama (56.4%). The integrated model village type of habitat is more found in Nasho(1.8%) and Kigina(1.5%). The dispersed/ isolated housing type is more found in Mushikiri(2.5%), Gahara(2.2%) and Nasho(2.1%).

The Table below displays results by sector.

Table 4. 3 Distribution (count and %) of the private households of Kirehe District by type of habitat and Sector

4.2.2 Tenure of the housing

The results of 5th RPHC 2022 indicate that the ownership of housing in the Eastern Province represents 72.1% and tenant represent 21.1%.

In Kirehe District, 12.6% of housing units are occupied by tenants while 74.0% are occupied by their owners.

At the sector level, the percentage of owners of households' units is high in Gahara (87.7%) and Mushikiri (87.4%) and it is low in Mahama (33.2%).

The percentage of tenants of housing units is high in Kigina (22.6%) and Kirehe(19.1%) and it is low in Mahama (5.2%). The Table below indicate details:

According to the area of residence, 3 types of tenure of housing units (owners, tenants and free lodging) predominate in urban areas as well as in rural areas.

The percentage of owners of housing units is 64.6% in urban areas to 74.7% in rural areas the percentage of tenants of housing units is 31.6% in urban areas to 11.2% in rural areas. The percentage of free lodging is 2.9% in urban areas to 2.8% in rural areas. The figures below indicate details:

Figure 4. 2 Distribution (%) of the private households of Kirehe District by tenure of the housing and area of residence

Source: Source: Fifth Rwanda Population and Housing Census, 2022 (NISR)

4.2.3 Material of the housing units

4.2.3.1 Main materials of the roof

The results of 5th RPHC 2022 indicate that housing units are mainly covered by iron sheets in Rwanda (74.1%), in the Eastern Province, the Iron sheet represent (98.9%).

In Kirehe District, housing units are mainly covered by iron sheets (99.5%). Only 0.5% are covered by local tiles.

The variation by sector is not very significant. The percentage of housing units covered by iron sheets is more than 98% in all sectors even if it is high in Kigina , Kirehe, Mahama and Nyarubuye sectors (99.9% each).

The highest percentage of the housing units covered by local tiles is found in Gahara sector (1.8%). The Table below displays details:

Table 4. 5 Distribution (count and %) of the private households of Kirehe district by main material of the roof of the housing units and by Sector

4.2.3.2 Main materials of the walls

The results of the census show that the most materials of the walls of the housing units are sundried bricks with cement: 36.3% in Rwanda, 36.4% in Eastern Province.

At the national level and province level, it is followed by sundried bricks without cement (30.7% and 30.5% respectively) while the first most materials of the walls of the housing units in Kirehe District are sundried bricks without cement (37.1%), followed by sundried bricks with cement(28.5%) and the third materials of the walls of the housing units are wood with mud without cement(21.9%).

At the sector level, sun dried bricks without cement are the mostly used materials in Mahama(57.3%) and less used in Kirehe(14.9%), Nyamugari(15.1%) and Kigina(15.8%).

Sun dried bricks with cement are the most frequently used material in Nyamugari (49.6%) and Nasho (46.2 %).

Wood with mud without cement are the mostly used materials in Mushikiri(44.0%) and Nyarubuye(40.1%).

The Table below displays details:

Source: Source: Fifth Rwanda Population and Housing Census, 2022 (NISR)

According to the area of residence, the main materials used for walls of the housing units in urban areas are mostly sun-dried bricks with cement(51.6%), followed by sun-dried bricks without cement(23.0%) and wood with mud and cement (10.9%).

In rural areas, the predominant materials are sun-dried bricks without cement(38.1%) followed by sun-dried bricks with cement(26.8%) and burnt bricks (5.4%). In rural areas, the predominant materials are sundried bricks 64.9% followed by wood with mud (32.9%) and wood with mud without cement (23.0%).

The figure below provides details:

Figure 4. 4 Distribution (%) of the private households of Kirehe District by main material of walls of the housing unit and by area of residence

Source: Source: Fifth Rwanda Population and Housing Census, 2022 (NISR)

4.2.3.3 Main materials of the floor

The results 5RPHC 2022 indicate that the main material of the floor of the housing units is the earth (60.4%) in countrywide as where as in the Eastern Province(60.9%). Cement is the second main material of the floor of the housing units where it is 31.2% at national level and 30.1% in Eastern province. In Kirehe District, the main material of the floor of the housing units is earth (62.1%), followed by cement (25.6%) and dung hardened (11.3%).

At sector level, the earth as main material used for the floor is most found in Gahara (74.7%), Mahama (74.0%) and Nasho (70.0%). The highest percentages of the housing units with cement as main material used for the floor are found in Kigina (39.5%) and Kirehe (38.5%). The highest percentage of the housing units with dung hardened as main material used for the floor is is found in Mushikiri(21.5%) and the ceramic/clay/granite is most found in Kirehe (1.1%) and Kigina (0.7%). The Table below displays details:

4.3 Source of energy of the private households

4.3.1 Grid line connectivity in Kirehe District

At national level, the results of the 5th RPHC 2022 revealed that 52.5% of private households are connected to the national grid while 47.5% are not connected. In Eastern Province, the percentage of private household connected to the national grid line is 47.3% while it is 47.5% in Kirehe district.

At the sector level, the highest percentage of private households connected to grid line is found in Gahara sector with 71.2% and the lowest percentage is Mahama with 27.2%.

Table below provides details:

Table 4. 8 Distribution (Count and %) of private households by connection to the National Grid line in Kirehe District by Sector and area of residence

4.3.2 Main source of energy for lighting in Kirehe district

In Kirehe district, the main source of energy for lighting used by households is electricity (57.1%), followed by flashlight/phone flashlight (33.3%).

At the sector level, the percentage of households using electricity for lighting is high in Gahara (70.3%) and Musaza while it is low in Mahama, the only sector where the percentage of private households using electricity is less than 50% (36.4%).

The sectors with the high percentages of private households using flashlight/phone flashlight for lighting are Mahama (50.5%), Nyamugari (37.1%), Kigarama (36.9%), Mpanga and Nasho (36.3% each).

Table below provides details:

4.3.3 Main sources of energy for cooking in Kirehe district

At the district level, the main sources of energy for cooking used by the private households are firewood (83.8%) followed by gas (11.1%) and charcoal (3.0%).

At the sector level, firewood is the most used source of cooking energy by private households at more than 90% in private households of 11 sectors out of 14, more than 80% by private households of 2 sectors while it is less used in Mahama (33.0%)

Sector with the highest percentage of private households using gas as main source of cooking energy is Mahama (62.2%). For others sectors, the use is less than 1% except Kirehe and Kigina (2.9% each).

Sectors with the high percentage of private households using charcoal as main source of energy for cooking are Kigina (9.3%) and Kirehe (7.7%).

The Table below illustrates details:

4.3.4.2 Main type of toilet facility

The results of census reveal that the main types of toilet facility used by the private households in Rwanda are not shared Pit Latrine with constructed floor slab (68.8%).

In Kirehe District, main types of toilet facility used by the private households are pit latrine with constructed floor slab used by one HH (74.2%), followed by pit latrine with constructed floor slab used by several HHs (20.2%) and pit latrine without constructed floor slab used by one HH (5.7%).

At the sector level, the percentage of private households using pit latrine with constructed floor slab used by one HH is between 81% and 87% in 11 sectors out of 14, between 74% and 78% in 2 sectors (Kigina with 74.3% and Kirehe with 77.6%). The percentage is low in Mahama with 32.4%.

For pit latrine with constructed floor slab used by several HHs, it is more found in Mahama (62.9%) while in other remaining sectors, the percentage is less than 21%.

The Table below indicates the types of toilets facilities.

4.4 Assets possessed by private households.

4.4.1 Communication assets possessed by private households in Kirehe District

At the district level, 80.7% of private households possess a radio, 76.9% a mobile phone, 14.4% a smartphone, 5.6% a TV and 1.1% a computer.

At sector level, the percentage of private households possessing a radio is high in Kirehe (84.8%), Kigina (84.2%) and Gatore (82.9%). It is low in Kigarama (77.2%) and Gahara (77.6%).

The percentage of private households possessing a television is high in Kirehe (11.1%) and Kigina (10.2%) and Nasho (9.1%) while it is low in Mahama (2.0%) and Kigarama (3.3%).

Mobile phone is mostly possessed by private households of Kirehe (81.9%), Kigina (79.3%) and Gatore (79.3%).

The sectors with high percentage of households with smartphone are Kirehe (22.7%), Mahama (22.2%) and Kigina (20.2%) while the percentage of households possessing this asset is low in Gahara (8.6%).

The computer is mostly possessed in Kirehe (3.7%) Kigina (2.5%) while the low percentage of households possessing computer is Mushikiri (0.4%).

The Table below provides details:

Table 4. 14 Percentage of private households of Kirehe district possessing communication assets by Sector

CHAPTER 5: AGRICULTURE IN KIREHE DISTRICT

The agriculture was the one of the areas of investigation of the 5th Rwanda Population and housing census conducted in 2022. The households engaged in Livestock husbandry; the number of private crop farming households cultivating different types of crops, by Sector, the number of private households raising different types of livestock, by Sector and type of household raised in district were captured in the census.

5.1 The households engaged in crop farming and livestock husbandly.

The results of 5th RPHC 2022 revealed that 2,280,854 private households (68.9%) are engaged in agriculture country wide. Among them, 62.6% are engaged in crop farming and 50.4% are engaged in Livestock husbandry.

In Kirehe district, agricultural households represent 74.1% with 68.8% of households engaged in crop farming and 51.5% in Livestock husbandry.

At the sector level, the highest percentages of agricultural households are found in Nyarubuye(85.1 %), Mushikiri(88.1%), Gahara(86.4%) and Kigarama(86.3%).

Households engaged in crop farming are more represented in Nyarubuye (80.4%), Kigarama(82.1%), Mushikiri(81.6%) and Gahara (80.4%) while those engaged in livestock husbandry are in Mushikiri (66.1%), Nyarubuye(63.4%) and Musaza(61.2%).

The table below provides details:

5.3 Distribution of private households engaged in raising different types of livestock, by Sector

Nationally, the results of the census indicate that most private households are considerably more engaged in raising cows, goats, pigs and chicken than other livestock.

At province level, most private households are more engaged in raising goats, cows, and chickens. It is in the same extent in Kirehe District.

The sectors that have high proportion of private households that are engaged in livestock are: Gahara, Kigarama, Mushikiri and Nyamugari. The Table below displays details:

Table 5. 3 Number of private households raising different types of livestock, by Sector.

Sectors	Number of Households					
	Cows	Goats	Sheep	Pigs	Rabbits	Chickens
