In February 2013 the All Urban general index is established at 118.8 this stands for an increase of 0.20% over the previous month which was 118.5. In annual change it increased by 4.79% compared to 5.67% in the previous month. This gives a general inflation rate by an annual average of 5.9% during the month of February 2013.

The underlying inflation rate (excluding fresh food and energy) is increased by 0.24% if compared to the previous month and increased by 5.06% on annual change. The annual average underlying inflation rate is + 3.7% (3.67%) in February 2013 down from the previous month 3.7% (3.74%).

The increase in the consumer price index of 0.20 is attributable primarily to the increase in Food and non-alcoholic beverages (0.11) and Housing, water, electricity, gas and other fuels (0.34).

In annual change, the increase in the general index of 4.79 is mainly due to the rising prices of Food and non alcoholic beverages(4.65), Housing, water, electricity, gas and other fuels (4.06) and Education (35.18) which contributed +1.73, +0.84 and + 1.33 respectively.

The 'local goods' increased by 4.99 on annual change with a monthly change of 0.19, while prices of the imported products increased by 4.00 on annual change with a monthly change of 0.24.

The prices of the fresh products had a positive annual change of 1.83 between February 2013 and February 2012.

Evolution (over 12 months) of the rate of inflation (%) ⁽¹⁾

METHODOLOGICAL NOTICE

The Consumer Price Index (CPI) is a measure of the average change over time of goods and services purchased by households. The CPI uses a Modified Laspeyres formula to calculate the index. The reference population for the CPI consists of all households, urban and rural, living in Rwanda.

The household basket includes 1,136 products observed in many places spread all over the administrative centers of all provinces in Rwanda. All kinds of places of observation are selected: shops, markets, services etc. More than 29,200 prices are collected every month by enumerators of the National Institute of Statistics of Rwanda and of the National Bank of Rwanda.

The index reference, or base, for the CPI is February 2009.

The weights used for the index are the result of the Household Living Conditions Survey (EICV II) conducted in 2005-2006 with a sample of 6,900 households.

How to Interpret the CPI

Movements of the indexes from one month to another usually are expressed as percent changes rather than changes in index points. The level of the index (relative to its base period) affects index point changes, but it does not affect percent changes. The following example illustrates how to calculate percent changes:

Index point change

CPI	178
Less CPI for previous period	<u>176</u>
Equals index point change	2

Percent change

Index point difference	2
Divided by the previous index	176
Equals	0.011
Results multiplied by 100	0.011 x 100
Equals percent change	1.1
