

REPUBLIC OF RWANDA

NATIONAL INSTITUTE OF STATISTICS OF RWANDA

QUARTERLY EXTERNAL TRADE STATISTICS (Q4 2013)

Kigali, 19th March 2014

1. KEY POINTS AND FIGURES

In the fourth quarter, 2013, Rwanda's total trade of US\$ 564.6 million was made up of imports of US\$ 415.5 million, exports of US\$ 121.5 million, and re-exports of US\$ 27.6 million.

On the imports side, Rwanda registered 9.77 percent increase in current price terms in the third quarter of 2013 compared to the same quarter of 2012.

The table below summarizes the trade of Rwanda for four quarters of the year 2012 and the four quarters of the year 2013.

Table 1: Rwanda's external trade (values in US\$ million)

2. INTRODUCTION

This is the publication for the fourth quarter 2013 of formal trade statistics. This publication gives also an overview of all quarters from 2012. The next publication is due in June 2014.

While we are able to capture the main products exported and imported, the data does not allow us at present to have a complete understanding of the final destination of our exports. For instance, Mombasa and Dar Es Salaam serve as exit ports for coffee and tea (after auctioning) and tracing the final destination of these products has proved difficult. In this publication, we will therefore be presenting the first destination of our exports instead of the final destination.

The raw data for this publication has been obtained from Rwanda Revenue Authority and then treated in EUROTRACE Database Management System. We follow the international standard classifications like the Harmonized Commodity Description and Coding System (HS) and the Standard International Trade Classification (SITC) which are linked to the national customs procedure codes. Furthermore, this publication follows the recommendations from the International Merchandise Trade Statistics (IMTS) of the United Nations Statistics Division (UNSD).

The following sections will be split into:

- Overall trade
- Rwanda's trade with EAC
- Rwanda's trade with other regional trading blocks

3. OVERALL TRADE

Milk and cream not containing sugar (US\$ 22.41 million); Niobium, vanadium ores, tantalum and concentrates (US\$ 21.59 million) were the main exports of Rwanda in the fourth quarter of 2013 as illustrated in the table below. In the same quarter of 2012; exports of Coffee (not roasted, not decaffeinated) ranked first with (US\$ 25.48 million).

Table 2: Top five exports of Rwanda for the third quarter 2013

HS CODES	Product name	Values in US\$ millions		Shares in percentages	
		2012Q4	2013Q4	2012Q4	2013Q4
	Total exports	107.0	121.5	100.0	100.0

The main exports to Tanzania in the fourth quarter of 2013 are:

- Niobium, vanadium ores, tantalum and concentrates (US\$ 20.20 million)
- Containers for compressed or liquefied gas, of iron or steel (US\$ 12.80 million)
- Tin ores and concentrates (US\$ 9.06 million)
- Coffee, not roasted, not decaffeinated (US\$ 7.10 million)
- Tungsten ores and concentrates (US\$ 0.49 million)

The main imports from China in the fourth quarter of 2013 are:

- Telephones for cellular networks or for Other wireless (US\$ 7.17 million)
- parts of non-domestic heating/cooling equipment (US\$ 6.55 million)
- Boilers for central heating (US\$ 4.58 million)
- Other (Structures & parts of structures, of iron/ steel) (US\$ 2.45 million)
- Other wooden furniture (US\$ 2.40million)

5. RWANDA'S TRADE WITH OTHER REGIONAL TRADING BLOCKS

Regarding the trade of Rwanda with regional organizations, the trade balance of Rwanda with CEPGL and SADC is positive for the third quarter of 2013.

For COMESA, COMMONWEALTH, EU and ECOWAS the trade balance is negative (that is the imports are higher than exports) in the third quarter of 2013.

Table 10: Rwanda's trade with other regional trading blocs (Values in US\$ million)

Partner	Flow \ Period	2012Q1	2012Q2	2012Q3	2012Q4	2013Q1	2013Q2	2013Q3	2013Q4

7. ANNEX A: TECHNICAL NOTES

Imports: Imports are goods or services that were produced abroad or Products of foreign origin brought into the country.

Exports: Goods and services produced in one country and sent to another country to be sold.

Re-exports: The export without further processing or transformation of good that has been recorded as imports.

Re-imports: imports of domestic goods which were previously recorded as exports.

Special Trade System

The special trade system is in use when the statistical territory comprises only the free circulation area, that is, the part within which goods "may be disposed of without customs restriction". Consequently, in such a case, imports include only goods entering the free circulation area of a compiling country and exports include only goods leaving the free circulation area of a compiling country. Under the strict definition, goods imported for inward processing and goods which enter or leave an industrial or commercial free zone or customs warehouses would not be recorded since they would not have been cleared through customs for home use. The compensating products after inward processing also would not be included in exports. It has to be used as a basis for producing trade balance and foreign trade statistics as a whole. The special trade system covers the following procedures:

(a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment, and goods which upon leaving a warehouse of free zone, are:

-declared for home use (including drawback system and goods that were accepted on temporary admission);

-accepted on temporary importation for inward processing;

-placed in industrial warehouse or industrial free zones;

-placed in customs bonded manufacturing plants or export processing zones;

-imported after temporary exportation for outward processing.

Goods put into circulation for home use after temporary importation, on leaving industrial warehouses, free zones and customs bonded manufacturing plants and export processing zones

no longer fall within the special trade regime.

(b) On exportation, goods which are:

- of national origin and declared for single exit;
- exported after temporary importation for inward processing;
- exported after release from industrial warehouses or industrial free zones;
- exported after release from customs bonded manufacturing plants or export processing zones;
- on temporary exportation for outward processing.

General Trade System

The general imports provide the most comprehensive record of the goods entering the economic territory of a compiling country and increasing the stock of its material resources while general exports provide the most comprehensive record of the goods leaving its territory and thus decreasing that stock. It is recommended, therefore, that countries use the general trade system for compilation of both their import and export statistics. It covers the following goods:

(a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment are:

- declared for home use;
- accepted on temporary admission;
- accepted on temporary importation for inward processing;
- placed in industrial warehouse or industrial free zones;
- placed in customs bonded manufacturing plants or export processing zones;
- imported after temporary exportation for outward processing;
- imported after temporary exportation for return in unaltered state;
- placed in customs bonded warehouses or commercial free zones.

(b) On exportation, goods which are:

- of national origin and declared for single exit;
- exported after temporary admission;
- exported after temporary importation for inward processing;
- exported after release from industrial warehouses or industrial free zones;

- exported after release from customs bonded manufacturing plants or export processing zones;
- on temporary exportation for outward processing;
- on temporary exportation for return in an unaltered state;
- released from customs warehouse or commercial free zones.
