NATIONAL INSTITUTE OF STATISTICS OF RWANDA

RWANDA EXTERNAL TRADE STATISTICS REPORT

THIRD QUARTER 2011

November 2011

FOREWORD

The National Institute of Statistics of Rwanda (NISR) is pleased to provide this publication on Rwanda External Trade Statistics for the third quarter of 2011. This publication will be continuously released one month after the end of every quarter.

Through this publication the National Institute of Statistics of Rwanda (NISR) aims at making official statistics more accessible and relevant for decision-making.

Inquiries and comments can be forwarded at:

TECHNICAL NOTES

Imports: Imports are goods or services that were produced abroad or Products of foreign origin brought into the country.

Exports: Goods and services produced in one country and sent to another country to be sold.

Re-exports: The export without further processing or transformation of good that has been recorded as imports.

Re-imports: imports of domestic goods which were previously recorded as exports.

The following are the definitions of General trade system and the Special trade system.

Special Trade System:

The **special trade system** is in use when the statistical territory comprises only the free circulation area, that is, the part within which goods "may be disposed of without customs restriction". Consequently, in such a case, imports include only goods entering the free circulation area of a compiling country and exports include only goods leaving the free circulation area of a compiling country. Under the strict definition, goods imported for inward processing and goods which enter or leave an industrial or commercial free zone or customs warehouses would not be recorded since they would not have been cleared through customs for home use. The compensating products after inward processing also would not be included in exports. It has to be used as a basis for producing trade balance and foreign trade statistics as a whole. The special trade system covers the following procedures:

- (a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment, and goods which upon leaving a warehouse of free zone, are:
 - declared for home use (including drawback system and goods that were accepted on temporary admission);
 - accepted on temporary importation for inward processing;
 - placed in industrial warehouse or industrial free zones;
 - placed in customs bonded manufacturing plants or export processing zones;
 - imported after temporary exportation for outward processing.

Goods put into circulation for home use after temporary importation, on leaving industrial warehouses, free zones and customs bonded manufacturing plants and export processing zones no longer fall within the special trade regime.

- (b) On exportation, goods which are:
- of national origin and declared for single exit;
 - exported after temporary importation for inward processing;
 - exported after release from industrial warehouses or industrial free zones;

 - exported after release from customs bonded manufacturing plants or export processing zones;
 - on temporary exportation for outward processing.

General Trade System:

The general imports provide the most comprehensive record of the goods entering the economic territory of a compiling country and increasing the stock of its material resources while general exports provide the most comprehensive record of the goods leaving its territory and thus decreasing that stock. It is recommended, therefore, that countries use the general trade system for compilation of both their import and export statistics. It covers the following goods:

- (a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment are:
- declared for home use;
 - accepted on temporary admission;
 - accepted on temporary importation for inward processing;
 - placed in industrial warehouse or industrial free zones;
 - placed in customs bonded manufacturing plants or export processing zones;

 - imported after temporary exportation for outward processing;
 - imported after temporary exportation for return in unaltered state;
 - placed in customs bonded warehouses or commercial free zones.
- (b) On exportation, goods which are:
- of national origin and declared for single exit;
 - exported after temporary admission;
 - exported after temporary importation for inward processing;
 - exported after release from industrial warehouses or industrial free zones;

 - exported after release from customs bonded manufacturing plants or export processing zones;
 - on temporary exportation for outward processing;
 - on temporary exportation for return in an unaltered state;
 - released from customs warehouse or commercial free zones.

SOURCES OF DATA

Rwanda Revenue Authority (RRA) (Customs Department)

Data are derived from Ascuda ++ and then treated by Eurotrace software.

The Eurotrace considers the General Trade system.

ACRONYMS

1. COMESA: Common Market for Eastern and Southern Africa
2. EAC: East African Community
3. ECOWAS: Economic Community Of West African States

Nov-11

Imports from EAC partner states increased by 17.0 per cent from US\$ 89.6 million in the second third 2010 to US\$ 104.8 million in the third quarter 2011. Uganda and KENYA continue to have big shares of RWANDA imports from EAC region for 49.9 and 30.3 per cent respectively. This is to say that more than 80 per cent of imports are from Uganda and Kenya. The share of imports from BURUNDI dropped to 0.9% against 1.3% in the second quarter of 2011.

Nov-11

Exports to EAC Partner States increased by 65.7 per cent from US\$ 9.88 million in the third quarter of 2010 to US\$ 16.37 million in 2011 in the same quarter. The decrease from the second quarter level of 2011 is 17.1 per cent. KENYA was the main destination of RWANDA with the share of 84.8 per cent of the total exports to EAC region, followed by Burundi and Uganda for 9.3 and 5.1 per cent respectively. Compared with third quarter 2010 level, the exports value to KENYA rose by 116.1 per cent and the export to Burundi also rose by 8.3 per cent while there is a decrease of 78.5 and 40.1 per cent of exports to Tanzania and Uganda respectively.

Nov-11

The majority of imports are from EAC, COMESA and European Union member states with the share of 28.7, 26.5 and 17.1 per cent respectively. All EAC partner states, except TANZANIA are members of COMESA. While total imports increased by 23.0 per cent EAC's accrued 17.9 per cent increase and those from ECOWAS decreased by 84.5 per cent compared with the third quarter of 2010.

Compared to 2011 second quarter EU registered an increase of 25.9 per cent while SADC scored a decrease of 13.7 per cent.
