

REPUBLIC OF RWANDA

PRODUCER PRICE INDEX (PPI)

Producer Price
Index
(PPI)

May 2019

1. Summary

This is the monthly publication of the Producer Price Index (PPI) for the month of May 2019. The main focus of this publication is general, local and export index.

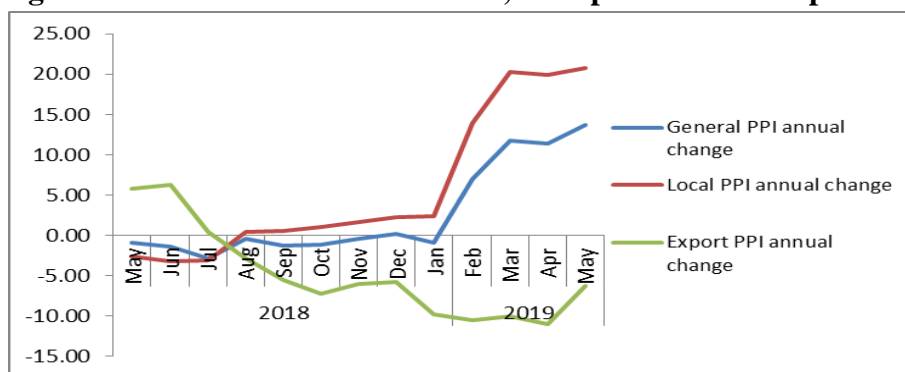

- General Producer Price Index increased by 13.75 percent on annual basis
- Local Producer Price Index increased by 20.72 percent on annual basis
- Export Producer Price Index decreased by 6.29 percent on annual basis
- General Producer Price Index increased by 0.63 percent on monthly basis
- Local Producer Price Index increased by 0.65 percent on monthly basis
- Export Producer Price Index increased by 0.66 percent on monthly basis

2. Introduction

The Producer Price Index (PPI) measures the average change over time in prices received by domestic producers for the production of their goods and services. The Producer Price Index for Rwanda is published on a monthly basis.

It presents price changes for all combined products, products for local sales and that for exports. It covers a sample of 114 establishments and 402 products spread countrywide, both in Kigali City and in rural areas.

The Producer Price Index survey is conducted jointly with the National Bank of Rwanda. It now covers mining, manufacturing and energy.

3. General Producer Price Index

Table 2 below presents the percentage changes on monthly and annual basis.

Table 2: Producer Price Index, General Index summary			Percentage change in May.2019		
Level	Index ID	ISIC rev. 4 Description	Weights	on Apr.2019	on May.2018
1	R	Rwanda	1000	0.63	13.75
2	RB	Mining and quarrying	96	2.87	-4.01
2	RC	Manufacturing	714	0.71	-0.99
2	RD	Electricity, gas, steam and air conditioning supply	58	0.00	32.73
2	RE	Water supply; sewerage, waste management and remediation activities	129	0.00	90.59
2	RJ	Information and communication	3	0.00	3.10

Source: NISR

General PPI increased by 13.75 percent in May 2019 compared to the same month of 2018. This is mainly due to an increase of 90.59 percent in price 'Water supply activities', 32.73 percent in prices of 'Electricity and gas supply activities', offset mainly by the decrease of 4.01 in Mining and quarrying.

The monthly general PPI increased by 0.63 percent compared to April 2019 mainly due to a increase of 2.87 percent in prices of mining and quarrying.

4. Local Producer Price Index

The table 3 below presents the percentage changes on monthly and annual basis.

Table 3: Producer Price Index, Local Index summary			Percentage change in May.2019		
Level	Index ID	ISIC rev. 4 Description	Weights	on Apr.2019	on May.2018
1	R	Rwanda	1000	0.65	20.72
2	RC	Manufacturing	749	1.18	0.37
2	RD	Electricity, gas, steam and air conditioning supply	76	0.00	32.73
2	RE	Water supply; sewerage, waste management and remediation activities	171	0.00	90.59
2	RJ	Information and communication	4	0.00	3.10

Source: NISR

Local PPI increased by 20.72 percent in May 2019 compared to the same month of 2018. This was mainly due to an increase of 90.59 percent in prices of 'Water supply activities', and 32.73 percent in prices of 'electricity and gas activities'.

The monthly local PPI increased by 0.65 percent compared to April 2019, mainly due to the increase of 1.18 percent in the prices of manufacturing.

5. Export Producer Price Index

The table below presents the index and the percentage changes on monthly and annual basis.

Level	Index ID	ISIC rev. 4 Description	Weights	Percentage change in May.2019	
				on Apr.2019	on May.2018
1	R	Exports	1000	0.66	-6.29
4	RB0729	Mining of other non-ferrous metal ores	393	2.87	-4.01
6	RC107980	Manufacture of coffee products	268	-13.96	-18.30
6	RC107990	Manufacture of tea products	328	6.42	-2.48
4	RC2029	Manufacture of other chemical products n.e.c.	10	0.32	3.09

Source: NISR

Export PPI decreased by 6.29 percent in May 2019 compared to the same month of 2018. This was mainly due to a general decrease in prices of export products, except prices of other chemicals (pyrethrum) which increased by 3.09 percent.

The monthly export PPI increased by 0.66 percent compared to April 2019 mainly due to an increase in prices of tea products, and non-ferrous metal ores, which increased by 6.42 and 2.87 percent respectively.

6. Technical note on PPI

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers of goods and services—goods and services which are output of production or enter in the production process.

NISR publishes PPI data for Mining, Manufacturing and Energy, and it will continue to be published monthly, about 4 weeks following the month under review.

The establishments are classified according to ISIC rev. 4; and the classification is determined by their main output.

The weights used in the PPI for Rwanda refer to the value of output (turnover without taxes) of establishments as reported in the 2011 Manpower survey collecting data for the year 2010, which constitutes the reference base period for the PPI calculation (December 2010). We plan to rebase the PPI using the weights as reported in establishment census 2017.

The point of pricing is the establishment. The price is the selling price received by the producer for the selected product as it leaves the factory gate. In general, prices are collected each month from the selected establishment by considering the mid-point of each month of the month under review.

The formula used in the PPI calculation is the geometric modified Laspeyres.
