NATIONAL INSTITUTE OF STATISTICS OF RWANDA

RWANDA EXTERNAL TRADE STATISTICS REPORT

FOURTH QUARTER 2011

January 2012

FOREWORD

The National Institute of Statistics of Rwanda (NISR) is pleased to provide this publication on Rwanda External Trade Statistics for the third quarter of 2011. This publication will be continuously released one month after the end of every quarter.

Through this publication the National Institute of Statistics of Rwanda (NISR) aims at making official statistics more accessible and relevant for decision-making.

Inquiries and comments can be forwarded at:

info@statistics.gov.rw

TECHNICAL NOTES

Imports: Imports are goods or services that were produced abroad or Products of foreign origin brought into the country.

Exports: Goods and services produced in one country and sent to another country to be sold.

Re-exports: The export without further processing or transformation of good that has been recorded as imports.

Re-imports: imports of domestic goods which were previously recorded as exports.

The following are the definitions of General trade system and the Special trade system.

Special Trade System:

The **special trade system** is in use when the statistical territory comprises only the free circulation area, that is, the part within which goods "may be disposed of without customs restriction". Consequently, in such a case, imports include only goods entering the free circulation area of a compiling country and exports include only goods leaving the free circulation area of a compiling country. Under the strict definition, goods imported for inward processing and goods which enter or leave an industrial or commercial free zone or customs warehouses would not be recorded since they would not have been cleared through customs for home use. The compensating products after inward processing also would not be included in exports. It has to be used as a basis for producing trade balance and foreign trade statistics as a whole. The special trade system covers the following procedures:

- (a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment, and goods which upon leaving a warehouse of free zone, are:
- declared for home use (including drawback system and goods that were accepted on temporary admission);
 - accepted on temporary importation for inward processing;
 - placed in industrial warehouse or industrial free zones;
 - placed in customs bonded manufacturing plants or export processing zones;
 - imported after temporary exportation for outward processing.

Goods put into circulation for home use after temporary importation, on leaving industrial warehouses, free zones and customs bonded manufacturing plants and export processing zones no longer fall within the special trade regime.

(b) On exportation, goods which are:

- of national origin and declared for single exit;
- exported after temporary importation for inward processing;
- exported after release from industrial warehouses or industrial free zones;
- exported after release from customs bonded manufacturing plants or export processing zones;
- on temporary exportation for outward processing.

General Trade System:

The general imports provide the most comprehensive record of the goods entering the economic territory of a compiling country and increasing the stock of its material resources while general exports provide the most comprehensive record of the goods leaving its territory and thus decreasing that stock. It is recommended, therefore, that countries use the general trade system for compilation of both their import and export statistics. It covers the following goods:

(a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment are:

- declared for home use;
- accepted on temporary admission;
- accepted on temporary importation for inward processing;
- placed in industrial warehouse or industrial free zones;
- placed in customs bonded manufacturing plants or export processing zones;
- imported after temporary exportation for outward processing;
- imported after temporary exportation for return in unaltered state;
- placed in customs bonded warehouses or commercial free zones.

(b) On exportation, goods which are:

- of national origin and declared for single exit;
- exported after temporary admission;
- exported after temporary importation for inward processing;
- exported after release from industrial warehouses or industrial free zones;
- exported after release from customs bonded manufacturing plants or export processing zones;
- on temporary exportation for outward processing;
- on temporary exportation for return in an unaltered state;
- released from customs warehouse or commercial free zones.

SOURCES OF DATA

Rwanda Revenue Authority (RRA) (Customs Department)

Data are derived from Ascuda ++ and then treated by Eurotrace software.

The Eurotrace considers the General Trade system.

ACRONYMS

1. COMESA: Common Market for Eastern and Southern Africa
2. EAC: East African Community
3. ECOWAS: Economic Community Of West African States
4. EU: European Union
5. HS : Harmonized System Codes Commodity Classification
6. NISR: National Institute of Statistics of Rwanda
7. Q1: First quarter
8. Q2: Second quarter
9. Q3: Third quarter
10. Q4: Fourth quarter
11. SADC: Southern African Development Community
12. SITC: Standard International Trade Classification
13. US\$: United States Dollar

January-12

Imports from EAC partner States decreased by 8.1% from US\$100.4 million in the fourth quarter 2010 to US\$ 92.3 million in the fourth quarter 2011. Uganda and KENYA continue to have big shares of RWANDA imports from EAC region for 51.6 and 32.9 per cent respectively. This is to say that almost 85 % of imports are from Uganda and Kenya. The share of imports from TANZANIA dropped to 14.9% in fourth quarter 2011 against 24.7% in the fourth quarter of 2010. While imports shares from Kenya and Uganda increased the Burundi's remains constant when compared to the last quarters of 2010 and 2011. The following graph shows the behaviour of imports from EAC and EAC partner States.

January-12

Exports to EAC partner States increased by 68.3 per cent from US\$ 14.38 million in the fourth quarter of 2010 to US\$ 24.19 million in 2011 in the same quarter. The decrease from the third quarter level of 2011 is 47.8 per cent. KENYA was the main destination of Rwandan exports with the share of 78.5 per cent of the total exports to EAC region, followed by Burundi and Uganda for 10.8 and 9.3 per cent respectively. Compared with third quarter 2011 level, the exports value to Burundi and Kenya rose by 71.4 and 36.8 per cent respectively while there was a high increase of 134.5 and 172.8 per cent of exports to Tanzania and Uganda respectively.

The majority of imports are from COMESA, EAC, and European Union member states with the share of 25.7, 25.2 and 16.8 per cent respectively. Note that all EAC partner states, except TANZANIA, are members of COMESA. While total imports increased by 17.4 per cent, EAC's accused 7.6 per cent decrease and those from ECOWAS increased by 147 per cent compared with the fourth quarter of 2010. Compared to 2011 third quarter ECOWAS and SADC registered respectively an increase of 507.4 and 40.3 per cent while EAC scored a decrease of 11.9 per cent. However, the overall level of imports remains almost unchanged from US million 365.3 in Q3 2011 to US million 366.1 in Q4 2011; a growth rate of 0.2%.

Table 4 shows that total exports of Rwanda increased by 87.5 per cent from US\$ 63.0 million in the fourth quarter of 2010 to US\$ 118.1 million in the fourth quarter of 2011 and the main destination was COMESA, EU and EAC with 39.4%, 29.7%, and 20.5% of shares respectively. Moreover, as it has been noticed in table 3 for imports, total general exports of Rwanda also increased at very low rate of 0.8%.
