NATIONAL INSTITUTE OF STATISTICS OF RWANDA

RWANDA EXTERNAL TRADE STATISTICS: 2009-2011

July 2011

## **FOREWORD**

The National Institute of Statistics of Rwanda (NISR) is pleased to provide this publication on Rwanda External Trade Statistics for the period starting from the first quarter of 2009 to the second quarter of 2011. This publication will be continuously released one month after the end of every quarter.

Through this publication the National Institute of Statistics of Rwanda (NISR) aims at making official statistics more accessible and relevant for decision-making.

Inquiries and comments can be forwarded at:

## TECHNICAL NOTES

**Imports:** Imports are goods or services that were produced abroad or Products of foreign origin brought into the country.

**Exports:** Goods and services produced in one country and sent to another country to be sold.

**Reexports:** The export without further processing or transformation of a good that has been recorded as imports.

**Re-imports:** imports of domestic goods which were previously recorded as exports.

The following are the definitions of General trade system and the Special trade system.

### **Special Trade System:**

The **special trade system** is in use when the statistical territory comprises only the free circulation area, that is, the part within which goods "may be disposed of without customs restriction". Consequently, in such a case, imports include only goods entering the free circulation area of a compiling country and exports include only goods leaving the free circulation area of a compiling country. Under the strict definition, goods imported for inward processing and goods which enter or leave an industrial or commercial free zone or customs warehouses would not be recorded since they would not have been cleared through customs for home use. The compensating products after inward processing also would not be included in exports. It has to be used as a basis for producing trade balance and foreign trade statistics as a whole. The special trade system covers the following procedures:

- (a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment, and goods which upon leaving a warehouse of free zone, are:
- declared for home use (including drawback system and goods that were accepted on temporary admission);
  - accepted on temporary importation for inward processing;
  - placed in industrial warehouse or industrial free zones;
  - placed in customs bonded manufacturing plants or export processing zones;
  - imported after temporary exportation for outward processing.

Goods put into circulation for home use after temporary importation, on leaving industrial warehouses, free zones and customs bonded manufacturing plants and export processing zones no longer fall within the special trade regime.

- (b) On exportation, goods which are:
- of national origin and declared for single exit;
  - exported after temporary importation for inward processing;
  - exported after release from industrial warehouses or industrial free zones;
  
  - exported after release from customs bonded manufacturing plants or export processing zones;
  - on temporary exportation for outward processing.

**General Trade System:**

The general imports provide the most comprehensive record of the goods entering the economic territory of a compiling country and increasing the stock of its material resources while general exports provide the most comprehensive record of the goods leaving its territory and thus decreasing that stock. It is recommended, therefore, that countries use the general trade system for compilation of both their import and export statistics. It covers the following goods:

- (a) On importation, goods which on direct importation into the statistical territory, upon leaving a depot, transit area or after transshipment are:
- declared for home use;
  - accepted on temporary admission;
  - accepted on temporary importation for inward processing;
  - placed in industrial warehouse or industrial free zones;
  - placed in customs bonded manufacturing plants or export processing zones;
  
  - imported after temporary exportation for outward processing;
  - imported after temporary exportation for return in unaltered state;
  - placed in customs bonded warehouses or commercial free zones.
- (b) On exportation, goods which are:
- of national origin and declared for single exit;
  - exported after temporary admission;
  - exported after temporary importation for inward processing;
  - exported after release from industrial warehouses or industrial free zones;
  
  - exported after release from customs bonded manufacturing plants or export processing zones;
  - on temporary exportation for outward processing;
  - on temporary exportation for return in an unaltered state;
  - released from customs warehouse or commercial free zones.

## **SOURCES OF DATA**

Rwanda Revenue Authority (RRA) (Customs Department)

Data are derived from Ascuda ++ and then treated by Eurotrace software.

The Eurotrace considers the General Trade system.

## **ACRONYMS**

1. COMESA: Common Market for Eastern and Southern Africa
2. EAC: East African Community

**Table 1: Rwanda's trade with EAC (US\$ million)**

Trade flows	2009	2010	% change
<b>Rwanda total trade</b>	<b>1368.8</b>	<b>1487.7</b>	<b>8.7%</b>
Total imports from EAC partner states	436.5	340.7	-21.9%
Total exports to EAC partner states	48.1	55.2	14.8%
Total RWANDA trade with EAC partner states	484.6	395.9	-18.3%
Trade balance	-388.4	-285.5	-26.5%
EAC partner states share (percent)	35.4%	26.6%	

Source: National Institute of Statistics of Rwanda  
July-11

Rwanda total trade with the world increased by 8.7 percent to US\$ 1487.7 million in 2010 compared to US\$ 1368.8 million in 2009. The Rwanda total trade with the EAC decreased by 18.3 percent to US\$ 395.9 million in 2010 compared to US\$ 484.6 million in 2009. The decrease, partly reflects the 21.9 percent decrease in imports from EAC from US\$ 436.5 million in 2009 to US\$ 340.7 million in 2010 while the exports increased by 14.8 percent from US\$ 48.1 million in 2009 to US\$ 55.2 million in 2010. Rwanda's exports to Kenya included tea in transit for auction in Mombasa.

During the period under review Rwanda's trade deficit decreased from US\$ 388.4 million to US\$ 285.5 million reflecting increased exports. As a percentage of the total Rwanda's trade, the Total RWANDA trade with EAC in 2009 and 2010 were 35.4 percent and 26.6 percent respectively.

July-11

Imports from EAC partner states increased by 31.8 percent from US\$ 77.8 million in the second quarter 2010 to US\$ 102.6 million in the second quarter 2011. Uganda and KENYA have the big shares of the RWANDA imports from EAC region for 46.6 and 28.5 percent respectively. This is to say that more than 75 percent of imports are from Uganda and Kenya. The imports from BURUNDI have a little share but they accuse an increase over time as shown by the table. Although KENYA has a big share in the imports, the value of imports from KENYA decrease progressively.

Figure1: Quarterly Imports of RWANDA from EAC for the periode2009-2011(US\$ million)

The Rwanda imports from EAC are ranging from US\$ 72.9 million in 2010 Quarter one to US\$ 138.4 million in 2009 quarter two. On the above chart, there is a huge increase of imports from KENYA in 2009 Quarter two. During this quarter RWANDA imported the **Generating sets with compression-ignition engines, >375 kVA** of US\$ 51,990,201.

July-11

Exports to EAC Partner States increased by 33 percent from US\$ 14.8 million in 2010 second quarter to US\$ 19.7 million in 2011 in the same quarter. The increase from the previous quarter of the same year is 19.4 percent. KENYA is the main destination of RWANDA with the share of 75 percent of the total exports to EAC region. The export to Burundi rose by 154.6 percent and the export to KENYA also rose by 45.8 percent while there is a decrease of 46.1 and 28.0 percent to Tanzania and Uganda respectively.

July-11

The majority of imports are from COMESA region and European Union member states with the share of 28.5 and 15.8 percent, respectively. All EAC partner states, except TANZANIA are also COMESA partner state. The imports of Rwanda from EAC region is 32.4 percent compared to the total imports of Rwanda from the World and an increase of 31.2 percent is remarkable compared to the previous quarter of the previous year.

The share of SADC region is 12.3 percent while the ECOWAS region had always the share less than 0.4 percent.
