INTRODUCTION

This Statistical Report of Formal External Trade in Goods covers the first quarter of 2020, the period running from January to March. It is produced by the External Trade Statistics Team of the Department of Economic Statistics (DES) at the National Institute of Statistics of Rwanda (NISR).

One of the key mandates of the DES is to compile, analyze and produce statistics and information on external trade sector following international recommendations. The Rwanda Revenue Authority (RRA), from the Customs Department, provides the data compiled by NISR. They are processed using EUROTRACE and MS Access database management systems (DBMS).

To collect and compile formal external trade statistics, NISR relies on the General Trade System under which the recorded aggregates include all goods entering or leaving the country's economic territory with the exception of simple transit trade.

Imports include goods brought in directly for domestic consumption plus goods imported into customs bonded warehouses.

Exports cover domestic exports defined as goods of national origin; that is, goods produced in the exporting country and the nationalized goods.

Re-exports which are exported in the same conditions as imported or after undergoing minor operations which leave them essentially unchanged and include re-exports from customs bonded warehouses.

Partner country is the last known country of destination for exports and the country of origin for imports by the time of compilation.

Valuation of imports and exports: Imports are valued on a CIF (Cost, Insurance and Freight) basis while exports and re-exports are valued on a FoB (Free on Board) basis.

Classification of commodities: The data are categorized by partner country and the international standard classifications such as the Harmonized Commodity Description and Coding System (HS) and the Standard International Trade Classification (SITC), all linked to the national Customs Procedure Codes (CPCs).

Furthermore, the compilation of External Trade Statistics abides by the recommendations of the *International Merchandise Trade Statistics: Concepts and Definitions 2010* (IMTS 2010) of the United Nations Statistics Division (UNSD). Hence, the data for this report are compiled on **IMTS 2010** basis (not to be confused with data compiled on **Balance of Payments** or **National Accounts** basis)
