

MAY 2021 INDEX OF INDUSTRIAL PRODUCTION (IIP)

This is the monthly Index of Industrial Production (IIP). Series has been developed by the National Institute of Statistics of Rwanda (NISR) to provide more timely estimates of the broad trends of industrial output. May 2021 Index of Industrial Production (IIP)

July 2021

NATIONAL INSTITUTE OF STATISTICS OF RWANDA

Monthly Index of Industrial Production- Formal Activity-May 2021

1. Summary

In May 2021, the Index of Industrial Production (IIP) shows that, industrial output (formal sector) increased by 40.7 percent compared to May 2020, against an increase of 6.2 percent on annual average basis.

Activities performed as follows:

- > Mining and quarrying increased by 68.0 percent;
- > Manufacturing increased by 21.2 percent;
- > Electricity increased by 18.6 percent; and
- > Water and waste management increased by 19.2 percent

Table 3: Index of Industrial Production, formal activity, 2017=100, annual average

6 Index of Industrial Production (formal activity) May 2021

Table 4: Linking factors between old base and new base (linking year = 2017)

Note:

-The series from 2017 are based on the new weights.

-For the years before 2017, the growth rates of old series are preserved by dividing the old series by the above linking factors.

Notes

In 2017, Rwanda has subscribed to IMF Enhanced General Data Dissemination System (E-GDDS). The E-GDDS is considered as a transition to the Special Data Dissemination Standard (SDDS) which is a more advanced stage. The aim was to subscribe to SDDS by June 2019. The system aims to encourage member countries to improve data quality; and guide member countries in the dissemination to the public of comprehensive, timely, accessible, and reliable economic, financial, and socio-demographic statistics.

In this regards, NISR as responsible institution for the compilation and publication of official statistics in Rwanda has mandate to develop the Index of Industrial Production (IIP) one of the missing requirement to fully compliance with SDDS. IIP series were developed since 2017 and the first publication was done in June 2019. In this publication a series from January 2011 have been compiled and availed to the public. Moreover, figures in this publication are the results of the 2017 rebasing exercise explained below in this note.

The Index of Industrial Production (IIP) is a statistical instrument used to monitor the monthly trends in output of industrial activities. By the SDDS, the index for any reference month has to be released within six weeks from the end of that month. They are developed based on a range of short term (monthly) indicators of economic activity.

The IIP in this statistical release relates to the activity of businesses in the formal sector in Rwanda, defined as those registered with the tax authorities. The IIP series is entirely consistent with the quarterly estimates of Gross Value Added published by NISR, which still provide the most comprehensive and detailed assessment of economic activity.

The scope of the IIP as recommended by the United Nations Statistical Office (UNSO) includes mining and quarrying, manufacturing, construction, electricity, gas and water production and supply. But due to constraints of data availability, the IIP compiled in Rwanda has excluded construction activities.

2017 Rebasing

The National Institute of Statistics of Rwanda finalised new series that are based on the 2017 weights replacing old series based on 2014 weights. The International best practice recommends doing it at least once in five years but in Rwanda it is compiled every three years due to the availability of information collected at a higher frequency. Note that the series from 2017 are based on the 2017 weights. For the years before 2017, the growth rates of old series are preserved by dividing the published indices by the linking factors found in the above table 4.

The IIP is produced based on monthly indicators of the volume of economic activity for eleven Rwanda Classification of Products by Activity (RCPA). These are weighted

together based on the gross value added in the reference year for the series (currently, 2017), consistent with the estimates of published value added within the Gross Domestic Product series, see table 5.

The correspondence table between RCPA and ISIC (International Standard Industrial Classification) Revision 4 is shown in Table 6.

| | | Gross Value Added (RWF, | Percentage of total |
|------|-------------------------------------------------------|----------------------------|---------------------|
| RCPA | Activity | billions) | GVA |
| В | Mining & quarrying | 57.4 | 13.0% |
| СА | Manufacturing of food | 105.8 | 23.9% |
| СВ | Manufacturing of beverages & tobacco | 75.3 | 17.0% |
| CC | Manufacturing of textiles, clothing & leather goods | 19.9 | 4.5% |
| CD | Manufacturing of wood & paper; printing | 11.5 | 2.6% |
| CE | Manufacturing of chemicals, rubber & plastic products | 25.0 | 5.7% |
| CF | Manufacturing of non-metallic mineral products | 22.4 | 5.1% |
| | Manufacturing of metal products, machinery & | 20.0 | 4.5% |
| CG | equipment | | |
| СН | Furniture & other manufacturing | 15.0 | 3.4% |
| D | Electricity | 83.6 | 18.9% |
| Е | Water & waste management | 6.2 | 1.4% |
| | Total | 442.1 | 100.0% |
