This report presents the results of the Agricultural Household Survey carried out from 6th September to 8th October 2020 taking into account gender aspects. The information enclosed in this report covers agricultural activities done in the 2019/2020 agricultural year. This survey gathered information at the household level about basic agriculture indicators related to demographic household characteristics, farm characteristics, livelihood activities, crop information, livestock production, level of inputs use, agricultural practices, extension services, level of implementation of agricultural programs, the financial aspect of agricultural households, and other agriculture-related indicators. Results have been disaggregated by sex (male and female farmers or male and female-headed households) to explore gender-related aspects in key social and economic characteristics of agricultural households in Rwanda.
