

The consumer price index (CPI), the producer price index (PPI) and the Index of Industrial Production (IIP) are economic indicators, and although CPI and PPI quantify price fluctuations for goods and services, they differ in the composition of their target sets of goods and services. IIP measures the real production output of mining and quarrying, manufacturing and utilities.

Consumer Price Index (CPI)

Rwanda's Consumer Price Index (CPI), main gauge of inflation increased by increased by 6.3 percent on annual basis (April 2025 compared to April 2024)

Producer Price Index (PPI)

Rwanda's general Producer Price Index combining both prices for local and export products registered an annual increase of 4.2 percent in March 2025.
