The Government of Rwanda through NISR conducted the 5th Rwanda Population and Housing Census (RPHC-5) from 16-30 August, 2022.

The 2022 RPHC is the most important project for the NSDS3 and was in line with national development efforts to develop official statistics and a dynamic evidence based for policy decisions. The Census results provide updated demographic, social and economic indicators for policy formulation and planning to support the national development agenda. Results of the 2022 Rwanda Population and Housing Census provide population, as well as demographic and socio-economic indicators at both national and sub-national levels.

After the dissemination of preliminary main Indicators in February 2023, NISR Is pleased to publish the detailed thematic reports of the 2022 Rwanda Population and Housing Census.

We recommend that the invaluable information contained in the different thematic reports of the 5th Rwanda Population and Housing Census be used as updated evidence for all decision and policy making for the national, regional and global development programs.
