In this report, the majority of tables provide results for both EICV4 and EICV5 and highlight developments over time, as well as different patterns across provinces in Rwanda, both in urban and rural areas. Emphasis has been placed on including disaggregated results for men and women and male and female-headed households to explore gender-related aspects in key social and economic characteristics of persons and households in Rwanda, as well as other types of disaggregation, such as age group, type of habitat, etc. Where necessary, districts tables have been provided in annex.
