The System of Agricultural Statistics in Rwanda (Improvement Action Plan)

Given the importance of the agricultural sector, the National Institute of Statistics of Rwanda is committed to build a new and improved System of Agricultural Statistics. This by emphasizing on the following:

- Put in place a strong and modern system of agricultural statistics system (an integrated system of agricultural censuses and surveys);
- Produce high quality, sustainable, harmonised and cost-effective crop production statistics for food security monitoring, programme evaluation, national accounting and other purposes;
- Review the existing estimates; and
- Build capacity for the responsible staff for the sustainability of the new system.
