

REPUBLIC OF RWANDA

CONSUMER PRICE INDEX (CPI)

SEPTEMBER 2022

10 October 2022

1. Summary

This is the monthly publication of the Consumer Price Index (CPI) for the month of September 2022. Urban CPI will be the focus of this publication as it is the headline index for monetary policy purposes.

1.1. Urban Index

Urban CPI increased by 17.6 percent on annual basis (September 2022 and September 2021) and increased by 2.1 percent on monthly basis (September 2022 to August 2022). The annual average inflation rate between September 2022 and September 2021 was 8.9 percent.

1.2. Rural Index

Rural CPI increased by 28.5 percent on annual basis and increased by 3.8 percent on monthly basis.

1.3. Overall Rwanda Index

Rwanda CPI increased by 23.9 percent on annual basis and increased by 3.1 percent on monthly basis.

2. Urban Consumer Price Index

The urban CPI is calculated based on approximately 1,622 products in twelve urban centres of Rwanda. The table below shows monthly and annual changes in September 2022 for the main categories of the urban index.

TABLE 2: Consumer Price Index, Urban summary

Code	Categories	Percentage change in Sep. 2022		
		Weights	on Aug. 2022	on Sep. 2021
	GENERAL INDEX	100%	2.1%	17.6%
01	Food and non-alcoholic beverages	27%	4.8%	33.2%
01.1.1	Bread and cereals	5%	7.0%	36.8%
01.1.2	Meat	2%	0.7%	18.2%
01.1.4	Milk cheese and eggs	1%	20.3%	29.9%
01.1.7	Vegetables	9%	6.5%	42.2%
01.2	Non-alcoholic beverages	1%	2.9%	17.3%
02	Alcoholic beverages tobacco and narcotics	5%	0.2%	11.0%
03	Clothing and footwear	5%	1.1%	10.7%
04	Housing water, electricity, gas and other fuels	21%	0.5%	7.9%
05	Furnishings household equipment and routine household maintenance	4%	0.4%	16.8%
06	Health	1%	0.2%	1.1%
07	Transport	12%	1.8%	14.5%
08	Communication	3%	0.3%	2.6%
09	Recreation and culture	3%	2.7%	11.1%
10	Education	3%	0.0%	7.6%
11	Restaurants and hotels	9%	0.7%	18.8%
12	Miscellaneous goods and services	6%	0.5%	7.9%

Source: NISR

Urban CPI increased by 17.6 percent in September 2022 compared to the same month of 2021. 'Food and non-alcoholic beverages' increased by 33.2 percent, 'Housing water, electricity, gas and other fuels' increased by 7.9 percent, Transport increased by 14.5 percent and Restaurants and Hotels increased by 18.8 percent.

The CPI for September 2022 increased by 2.1 percent compared to August 2022. 'Food and non-alcoholic beverages' increased by 4.8 percent and Transport increased by 1.8 percent.

The underlying inflation rate (excluding fresh food and energy) increased by 13.6 percent when compared to September 2021 and increased by 1.1 percent when compared to August 2022 (See Table 4).

The annual average inflation rate between September 2022 and September 2021 is 8.9 percent. The annual average underlying inflation rate is 8.2 percent.

3. Other selected urban indices

This section highlights five selected urban indices: the local goods index, the imported goods index, the fresh products index, the energy index and the core index.

On annual basis, the local goods index increased by 16.8 percent, the imported goods index increased by 20.1 percent, the fresh products index increased by 33.2 percent, the energy index increased by 20.3 percent and the core index or the general index excluding fresh products and energy increased by 13.6 percent.

On monthly basis, the local goods index increased by 2.1 percent, the imported goods index increased by 2.3 percent, the fresh products index increased by 6.4 percent, the energy index increased by 1.7 percent and the core index increased by 1.1 percent.

TABLE 4: Consumer Price Index (Urban only), Core & other			
Categories	Weights	Percentage change in Sep. 2022	
		on Aug. 2022	on Sep. 2021
GENERAL INDEX	100%	2.1%	17.6%
Local Goods Index	77%	2.1%	16.8%
Food and non-alcoholic beverages	21%	5.1%	34.7%
Housing, water, electricity, gas and other fuels	21%	0.5%	7.9%
Transport	6%	1.1%	6.9%
Imported Goods Index	23%	2.3%	20.1%
Food and non-alcoholic beverages	7%	4.0%	28.7%
Furnishing, household equipment	2%	0.1%	23.0%
Transport	6%	2.4%	21.0%
Fresh Products index¹	16%	6.4%	33.2%
Energy index	7%	1.7%	20.3%
General Index excluding fresh Products and	77%	1.1%	13.6%
<i>Source: NISR</i>			
(1) Fresh products are food products which have seasonal fluctuations			
(2) Proxy for underlying inflation			

4. Methodological notice

The Consumer Price Index (CPI) is a measure of the average change over time of goods and services purchased by households. The CPI uses a Modified Laspeyres formula to calculate the index. The reference population for the CPI consists of all households, urban and rural in Rwanda.

The household basket includes 1,622 products sold in many places spread all over the country. A variety of places of observation are selected: shops, markets, hospitals, schools etc. More than 29,482 prices in urban areas and 10,744 in rural areas are collected every month.

Weights used for the index are from the Household Living Conditions Survey (EICV4) results conducted in 2013-2014 with a sample of 14,419 households.

Each month, NISR publishes the All Rwanda index, All Urban index and All Rural index. The Urban CPI is considered as the headline index for monetary policy purposes. In addition, select detailed item indices are published for items judged to be important or experiencing extreme price movement.

4.1 Main terms used in Rwandan CPI

General index: The highest level of aggregation of a CPI which covers all the items within the scope of the CPI

Core (underlying) inflation: A type of CPI which shows the underlying trend in inflation by excluding those movements which arise from transient factors such as seasonality or other short term price volatility

Index reference period (Feb 2014=100): The period with which all other periods are compared (the period for which the value of the CPI is set at 100).

Monthly inflation: Compare the current index number compared with the index number of the previous month

Annual inflation: Compare the index number for a particular month with the index number for the same month of the previous year

Annual average inflation: Compare the average of all the monthly indices in a particular year with the corresponding average for the previous year. Any twelve-month average (eg. from July 2016 to June 2017) may be compared with the twelve-month average (also from July 2015 to June 2016) in order to calculate June 2017 inflation rate.

4. 2. How to Interpret CPI

Movements of the indices from one month to another usually are expressed as percentage changes rather than changes in index points. The level of the index (relative to its base period) affects index point changes, but it does not affect percent changes. The following example illustrates how to calculate percentage changes:

Index point change

CPI	178
Less CPI for previous period	<u>176</u>
Equals index point change	2

Percent change

Index point difference	2
Divided by the previous index	176
Equals	0.011
Results multiplied by 100	0.011×100
Equals percent change	1.1
