National Institute of Statistics of Rwanda (NISR), Producer Price Index (PPI) Report, September 2026

Summary

This is the monthly publication of the Producer Price Index (PPI) for September 2026. Please note that the sample, weights, and methodology used to compile the PPI were updated starting with the November 2025 index. The index has also been updated, with 2024 = 100. Rates of change for periods prior to November 2025 have not been revised; however, minor differences from previously published indices may occur at the first decimal place due to rounding.

On annual basis:

- General Producer Price Index increased by 21.5 percent,
- Local Producer Price Index increased by 22.2 percent,
- Export Producer Price Index increased by 17.3 percent.

On monthly basis:

- General Producer Price Index increased by 2.9 percent,
- Local Producer Price Index increased by 3.2 percent,
- Export Producer Price Index increased by 0.3 percent.

1. Introduction

The Producer Price Index (PPI) measures the average change over time in prices received by domestic producers to produce their goods and services. The PPI for Rwanda is published on a monthly basis. It presents price changes for all aggregated products, products for local sales, and those for exports, and covers mining, manufacturing, and utilities.

2. General Producer Price Index

Table below presents the percentage changes on a monthly and annual basis.

Table 2: Producer Price Index, General Index summary

ISIC rev. 4 Description	Weights	Percentage change in September 2026	
		on August 2026	on September 2025
General index	1000	2.9	21.5
Mining and quarrying	52	-1.5	56.9
Manufacturing	872	3.3	21.2
Electricity, gas, steam and air conditioning supply	54	0.0	0.0
Water supply; sewerage, waste management and remediation activities	22	0.0	0.0

Source: NISR

In September 2026, the general PPI increased by 21.5 percent when compared to the same month of 2025. This is due to an increase of 56.9 percent in prices of mining activities and an increase of 21.2 percent in prices of manufacturing activities.

On a monthly basis, the general PPI increased by 2.9 percent. This is due to an increase of 3.3 percent in prices of manufacturing activities while prices of mining activities decreased by 1.5 percent.

3. Local Producer Price Index

The table below presents the percentage changes on a monthly and annual basis.

Table 3: Producer Price Index, Local Index summary

ISIC rev. 4 Description	Weights	Percentage change in September 2026	
		on August 2026	on September 2025
General index	1000	3.2	22.2
Manufacturing	916	3.5	24.4
Electricity, gas, steam and air conditioning supply	60	0.0	0.0
Water supply; sewerage, waste management and remediation activities	24	0.0	0.0

Source: NISR

In September 2026, the local PPI increased by 22.2 percent when compared to the same month of 2025. This is due to an increase of 24.4 percent in prices of manufacturing activities.

On a monthly basis, the local PPI increased by 3.2 percent. This is due to an increase of 3.5 percent in prices of manufacturing activities.

4. Export Producer Price Index

The table below presents the percentage changes on monthly and annual basis.

Table 4: Producer Price Index, Exports Index summary

ISIC rev. 4 Description	Weights	Percentage change in September 2026	
		on August 2026	on September 2025
General Index	1000	0.3	17.3
Mining and quarrying	506	-1.5	56.9
Manufacturing	494	2.1	-14.1

Source: NISR

In September 2026, the export PPI increased by 17.3 percent when compared to the same month of 2025. This is due to an increase of 56.9 percent in prices of mining activities. While prices of manufacturing activities decreased by 14.1 percent.

On a monthly basis, the export PPI increased by 0.3 percent. This is due to an increase of 2.1 percent in prices of manufacturing activities while prices of mining activities decreased by 1.5 percent.

Technical note on PPI

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers of goods and services, which are outputs of production or enter into the production process.

NISR publishes PPI data for Mining, Manufacturing, and Utilities; it is published on a monthly basis, about 4 weeks following the month under review.

The establishments are classified according to ISIC rev.4. Products from establishments with significant secondary activities are classified according to the products' characteristics, rather than the establishment's main activity.

The weights used in the PPI for Rwanda refer to the value of output (turnover without taxes) of establishments as reported in the 2024 National Accounts.

The point of pricing is the establishment. The price is the selling price received by the producer for the selected product as it leaves the factory gate. In general, prices are collected each month from the selected establishment by considering the mid-point of each month of the month under review.

The formula used in the PPI calculation is a monthly chained Laspeyres-type formula.
